

## Samsung's 9-hour battery netbook

With a battery capacity of 8,850 mAh, Samsung's X120 netbook can use 9 hours continuously

**With a battery capacity of 8,850 mAh, Samsung's X120 netbook can use 9 hours of interconnection c.**

Unlike other netbooks, which often have a 12-inch screen, Samsung's products are a bit smaller with an 11.6-inch HD HD backlit 16: 9 aspect ratio (resolution of 1366 x 768 pixels). This model is also equipped with a CULV power-saving processor and slightly changed from the Pinetrail platform from the manufacturer.

The X120 can use batteries continuously for more than 8 hours. *Photo: Samsung* .

The X120 stands out with its 8,850 mAh battery that can be used continuously for 8 to 9 hours. It has a chrome-plated metal rim around the luxury machine. Touchpad has multi-touch feature with two mouse buttons on both sides. However, although the area above the keyboard is pretty much empty, Samsung does not add some shortcuts to these locations for the convenience of users.

The X120 has an Intel Pentium ULV SU4100 processor (1.30 GHz, 800MHz, 1MB), GMA 4500M HD graphics chip, 2GB DDR3 memory, and achieved 2,440 points with PCMark05 test software.

In addition to being integrated with standard Wi-Fi, Samsung's products also have common connectors such as Ethernet, HDMI, 3 USB ports, headsets, microphones, memory card readers.

The X120 comes preloaded with Windows 7 Home Premium operating system and sells for nearly \$ 800.
