Yesterday, Samsung unveiled its X-series lineup of three X420 (14 inch) models, X520 (14.6 inches) and X120 (11.6 inches), all of which are about 2.4 cm thick, these are models. has a slim, shiny design.

Samsung's new laptop can be used continuously for 9 hours with a 6-cell battery, (for X420 and X520), especially the X120 has a 4-cell battery. These products will cost between 699 and 899 euros (ie 1,000 to 1,286 USD), which will be sold next month in Europe and Asia.

One of the unique features of the X-series is the rigid frame, tested at the launch, and one of its employees has put it on the floor and stepped on it.
