

Samsung's ultra-thin Series 5 view

In addition to the 13-inch screen version, Samsung's Series 5 has an additional 14-inch option. Users can also choose a 1TB hard drive for 14-inch versions and 500GB for 13-inch copies or 128GB SSDs.

Samsung's 13-inch 5-inch series weighs 1.43 kg and is only 17.6 mm thin.

In addition to the 13-inch screen version, Samsung's Series 5 has an additional 14-inch option. Users can also choose a 1TB hard drive for 14-inch versions and 500GB for 13-inch copies or 128GB SSDs. Samsung Series 5 newly integrated RAM memory is 8GB. The 14-inch version of Samsung Series 5 is equipped with an optical drive.

Samsung's new product line is equipped with connections like Ethernet and HDMI. The 14-inch 5-inch series also incorporates an AMD Radeon HD7550M graphics card. The screen of the machine is wrapped with a layer of anti-glare when viewed outdoors. When equipped with an SSD port, Samsung products can recover from "hibernating" in only 7 seconds, and the "Sleep" status is 2 seconds.

The manufacturer plans to launch its product in Korea in December. The 13-inch version is priced from USD 1,124-1,298, a 14-inch version from USD 1,168-1,342

Some actual photos of Samsung Series 5 13 and 14 inch versions.
