

See a \$ 45,000 laser gun sweeping away all stains on metal in a flash

You will be amazed to see this suburban performance.

You will be amazed to see this suburban performance. **The 1000 watt laser gun** flies any stain or stubborn dirt "as easy as eating candy" on every surface.

This super powerful laser gun is a product of Belgian company **P-Laser** . " *Think of it as a powerful version of the barcode scanner that you often see in stores,* " said P-Laser's R&D researcher Thijs Peeters. " *Basically, this is a laser machine gun that emits very high-speed light bullets. When light hits the surface, dirt and any oxide above the surface absorbs light energy and then disappeared, nothing left.* "

Laser cleaning method has many advantages over chemical methods: environmentally friendly, low cost, high accuracy. With lasers, we can regulate laser light to make it focus more or more dispersed from which we can control its intensity.

But, now the cost of a 1000 watt laser gun is quite high at nearly \$ 45,000, so most of them are used in businesses.

The manufacturer is working to reduce the cost of the product in the hope that in the future this gun can be used to scrub dirt in the home.

Removing rust by laser (headphone should not be used when watching)
