

See the new face of the MacBook Pro Retina

LG has just introduced a new Ultrabook called Z935. This Ultrabook uses Intel Haswell processor, 13-inch screen with high resolution and two microSD card slots.

LG has just introduced a new Ultrabook called Z935. This Ultrabook uses Intel Haswell processor, 13-inch screen with high resolution and two microSD card slots. This is considered one of the new competitors for Apple's MacBook Pro Retina line.

According to the *UltrabookNews* , the Z935 is 31.5x21.8x1.3 cm and weighs only 1.13 kg, but the Ultrabook still has two USB ports, an HDMI port, an Ethernet port and especially two microSD card slots.

On the storage side, the Z935 owns SSDs with capacities up to 256GB and 8GB of RAM. The 13-inch IPS screen of the Z935 has a resolution of 2560x1440 pixels.

Z935 is expected to be released in **November** in Korea at a price of about **1,000 USD** (equivalent to **21 million VND**).
