

# See the speed and duration of iOS 12.3 battery with iOS 12.2, should the upgrade be done?

YouTube channel iAppleBytes has conducted tests to compare the speed and battery life between iOS 12.3 version and iOS 12.2 when operating on iPhone 5s, 6, 6s, 7 and iPhone 8 to help users easily decide whether to update your smartphone.

Apple has released iOS 12.3 updates with many advances for iOS devices. And YouTube channel iAppleBytes has conducted tests to compare the speed and battery life between iOS 12.3 version and iOS 12.2 when operating on iPhone 5s, 6, 6s, 7 and iPhone 8 to make it easier for users. Easy decision to decide whether to update your smartphone.

In order for the devices to operate at maximum efficiency and for accurate results, the tests were performed under ideal room temperature conditions (about 19 degrees Celsius).

## Compare speed between iOS 12.3 and iOS 12.2 on iPhone 5s, 6, 6s, 7 and iPhone 8

The results after performing the tests showed that each version has its advantages and disadvantages, but in general, iOS 12.3 gives users a better experience with the majority of the operations are frequently used. Use smoother than iOS 12.2. At the same time, devices using iOS 12.3 version also have better response speed than iOS 12.2 version.

## Compare battery life between iOS 12.3 and iOS 12.2 on iPhone 6 and iPhone 6S

IAAppleBytes channel uses Geekbench 4 application to perform tests and measure the amount of battery life on iOS 12.3 with iOS 12.2.

The test results are as follows:

Đối với iOS 12.2:	
iPhone 6 (mức pin 100%): 1418 điểm Geekbench pin hoạt động trong 2h23'	
iPhone 6S (mức pin 100%): 2060 điểm Geekbench pin hoạt động trong 3h26'	
Đối với iOS 12.3:	
iPhone 6 (mức pin 100%): 1452 điểm Geekbench pin hoạt động trong 2h34'	
iPhone 6S (mức pin 100%): 2000 điểm Geekbench pin hoạt động trong 3h20'	

Although there is no significant change, the battery life of iOS 12.3 is slightly higher than iOS 12.2 when operating on iPhone 6.

The results of these tests are for reference only, in fact depending on the environment used, the speed and battery life of iOS 12.3, iOS 12.2 will be different.
