Number of refrigerator capacity that a user uses?

This is a question that many people care about. According to **Cnet.com** (America's leading technology news site), usually one user in the world uses an average of 113 liters of refrigerators.

However, this is also an information for your reference only.

How to choose the refrigerator capacity according to the number of family members

1. Capacity of less than 150 liters

This capacity level is usually suitable for single people, students or families 1-2 people with a low demand for food storage.

A refrigerator less than 150 liters will often have a 2-door design with a freezer compartment, or a compact mini fridge that can be easily moved.

This product line will usually cost around VND 5,000,000.

2. Capacity of 150 - 300 liters

150 - 300 liters capacity suitable for families with 2-3 members.

Refrigerator from 150 - 300 liters is the segment that Vietnamese consumers choose the most to meet the demand for food storage as well as save energy with energy-saving Inverter technology and familiar ice compartment design.

With prices fluctuating around 5,000,000 VND to over 10,000,000 VND, users can choose for themselves a refrigerator in this capacity range, very suitable for the average income of Vietnamese people.

3. Capacity of 300 - 400 liters

The capacity in this range is suitable for families of 3-4 members. The cabinet can store food for use in about 2-3 days a week.

This is the level of capacity that many people choose because it satisfies the demand of each family member. In addition, these refrigerators also have integrated modern technologies such as inverter energy saving, convenient soft freezing, and convenient lower-case compartment design.

At a cost of more than VND 7,000,000, housewives were able to choose a refrigerator of over 300 liters to store food daily.

4. Capacity of 400 - 550 liters

This is the appropriate volume for families of about 5 members. Products with a capacity of about 550 liters are often called side by side refrigerators that are increasingly being chosen by customers. It can meet the needs of long-term food storage, besides the luxurious and modern design and the price is not too "expensive", about 13,000,000 VND, you can afford possess them.

5. Capacity of over 550 liters

This refrigerator is usually for families with generations of 5 - 7 people, especially in addition to storing long-term food, it also conquers users by eye-catching and luxurious design combining modern technology elements Comes as:

1. Automatic ice making.
2. Get water outside.
3. Soft frozen.
4. Remote control by phone.
5. Smart sensor .

With a price range of about 15,000,000 VND, you can own large capacity refrigerators of some companies such as Samsung, Sharp, Toshiba or more advanced ones of Hitachi, Panasonic, Mitsubishi, LG with the price of over 30,000,000 VND. VND

Summary
