

Send 1GB email attachment to Pando

With the method of sending new attachments of Pando Networks users can send 1GB of data via email or via Yahoo Messenger. The method of sending new attachments by Pando Networks is in fact a completely new and easy to use attachment attachment software.

With the method of sending new attachments of Pando Networks users can send 1GB of data via email or via Yahoo Messenger.

The method of sending new attachments by Pando Networks is in fact a completely new and easy to use attachment attachment software.

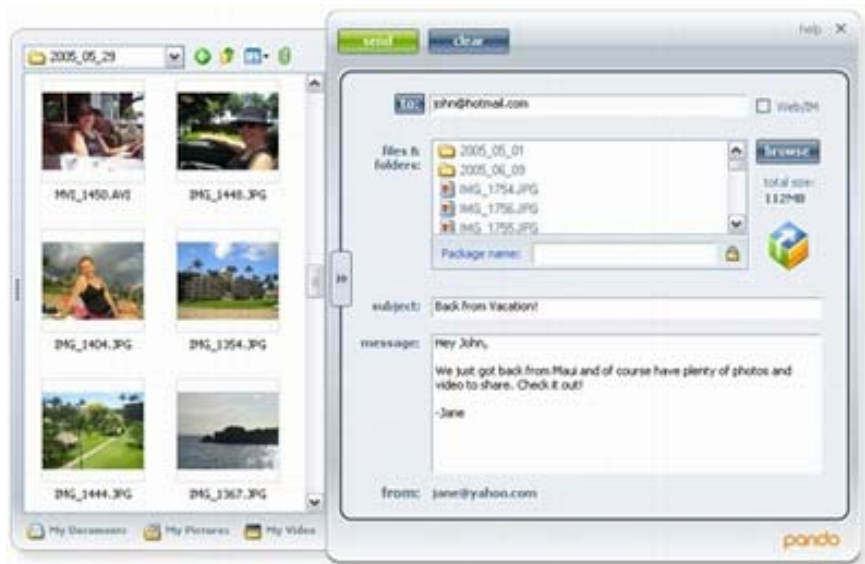

Most email service providers limit the size of attachments to 10MB. This capacity is relatively suitable for data types such as text or images but that capacity is not enough to send both a photo album, a song or a video. Whether the email service provider allows you to send large data files but not sure the service provider will accept them.

But with Pando's new software, large files will automatically be converted into a smaller file to send to recipients. Meanwhile, the original version of that file was uploaded to Pando's server. To download the file the recipient also needs to install Pando's software. The original file will be permanently removed from Pando's server after 14 days.

With Internet Explorer on the Windows operating system platform, users can directly use plug-ins to email applications but Mac users need to have a standalone application to use the feature.

Pando software accepts users to send data files up to 1GB in size, 10 times more than the accepted capacity sent via YouSendit.com. Another advantage of Pando is its direct integration into the email application.

Pando's software is currently compatible with a variety of email services, from popular email services such as Yahoo Mail, Hotmail, Gmail, AOL Mail, Beta Mail and Microsoft Outlook.

Not only that, Pando is also compatible with both Yahoo Messenger and Skype Beta 3. This means that users can completely share via instant messaging service 1GB of data, share photos, videos or music. .

You can download Pando software here. This is a completely free software but has ads.
