

# Sense Desktop: The best clock for Windows 10 desktop

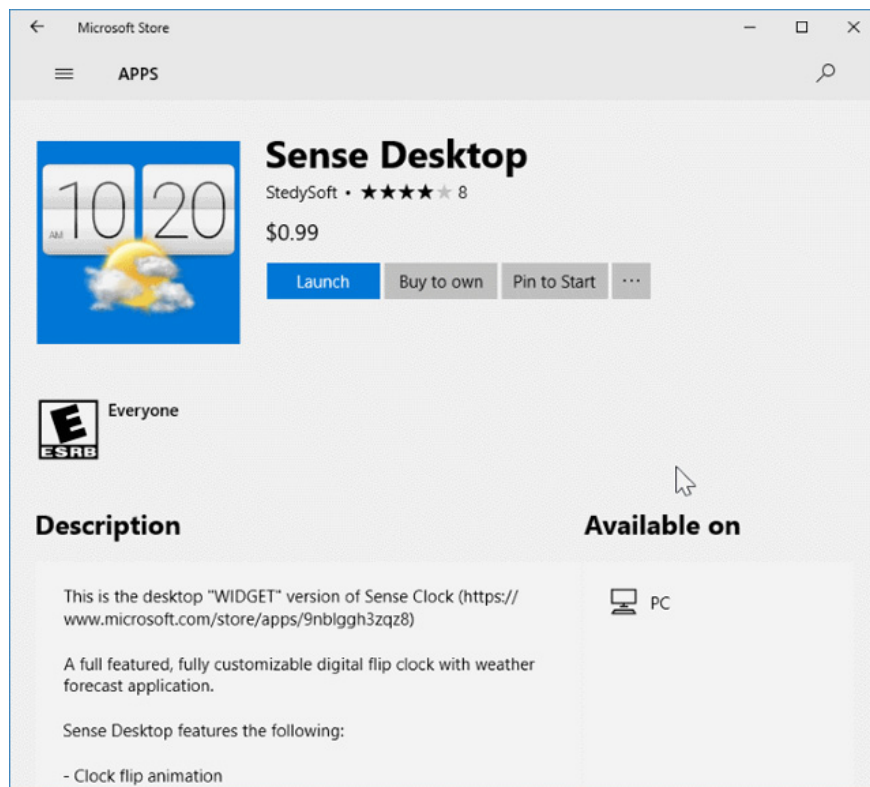

On Windows 10, there is a default clock on the Taskbar, but many people find it a bit small compared to their computer screens. Therefore, this article will introduce you to a great desktop clock application for Windows 10.

On Windows 10, there is a default clock on the Taskbar, but many people find it a bit small compared to their computer screens. Therefore, this article will introduce you to a great desktop clock application for Windows 10.

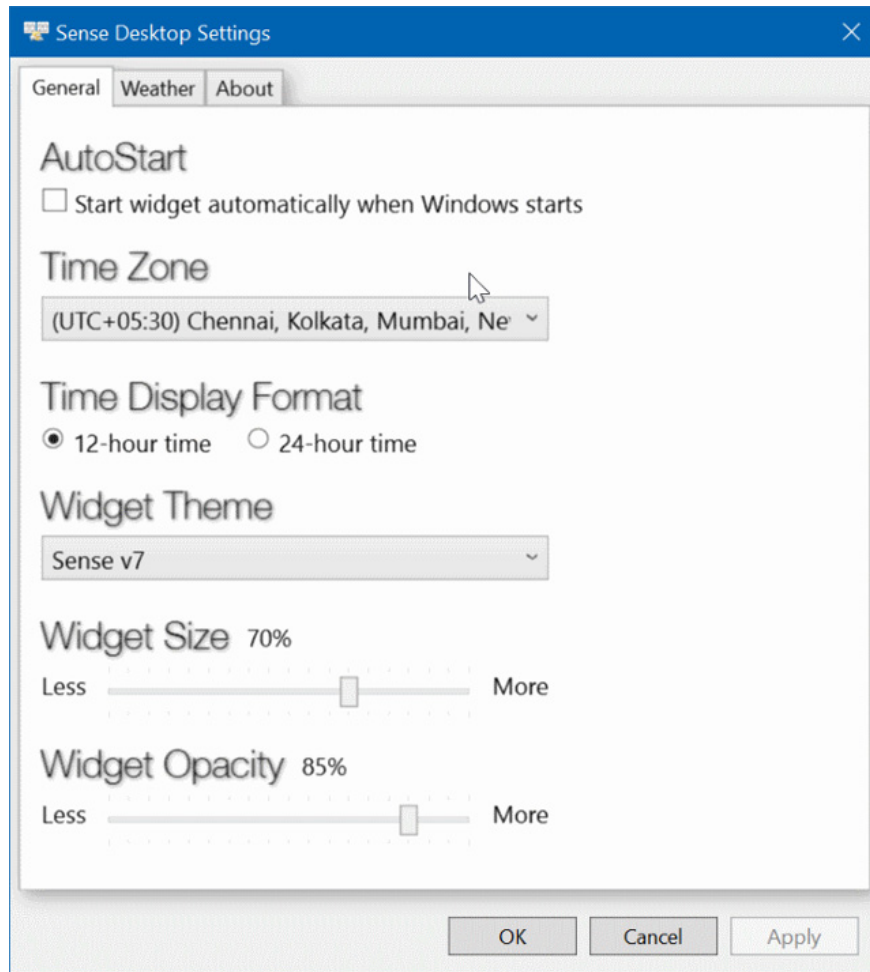

But before we introduce this desktop clock, we'll talk about desktop gadgets and why not use it. As you know, gadgets or desktop widgets are no longer an official part of Windows 10 because Microsoft has removed these utilities from this operating system for security reasons and has no built-in replacements. on Windows 10. So here we will not use gadgets even though we can download and install on Windows 10. See Gadgets article back to Windows 10 Desktop if you want to use these utilities.

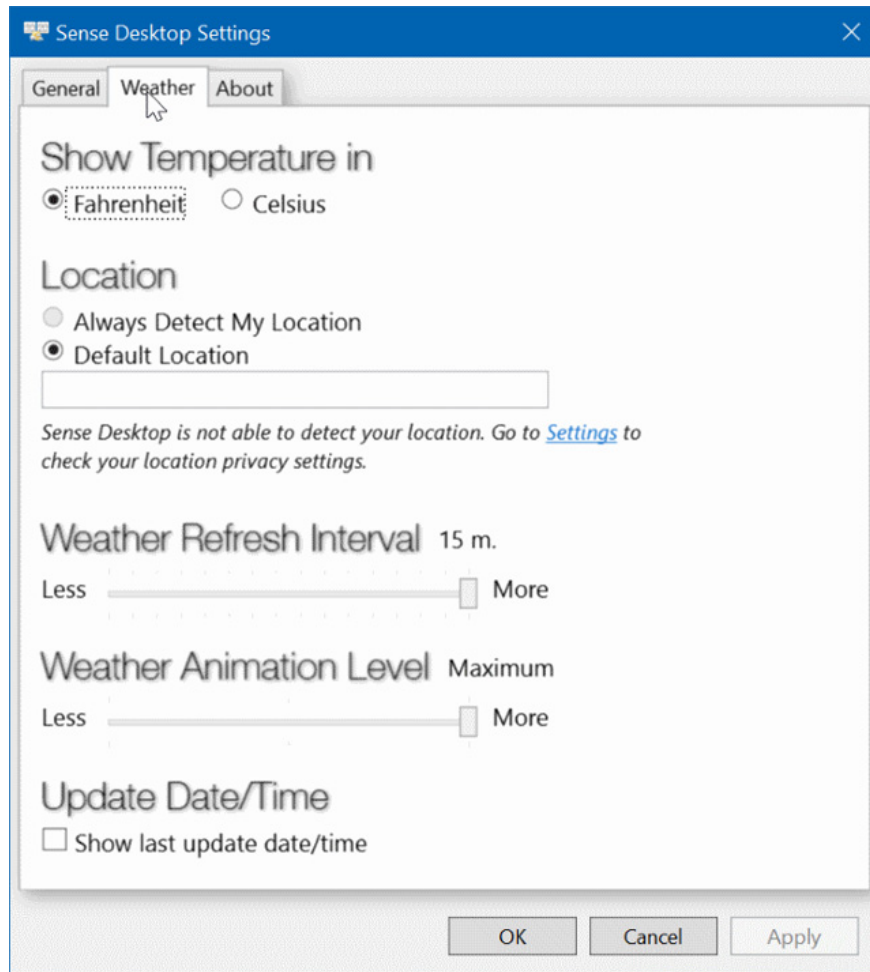

Sense Desktop is a Windows Store application designed to set the clock on the desktop wallpaper. This app is not free, but you only need to pay a very small cost of \$ 1 to own it. As the name suggests, the watch is inspired by the UI of HTC Sense.

Utility Sense Desktop in addition to displaying the time, it also displays the date and weather information with animations. Users can choose or change the position and animation, move and place anywhere on the desktop.

In addition, users can choose time zone, time display format (12 or 24 hours), size and opacity. There is an option to display the temperature in degrees Celsius or Fahrenheit by clicking on it and opening Settings.

Sense Desktop is a clock with beautiful interface and many functions for Windows 10 computer. If you are looking for a desktop clock, try it.

**Download** : Desktop Sense (Windows Store)
