You set a wallpaper for your iPhone but get an annoying zoom error? Today I will tell you how to set a simple iPhone wallpaper without zooming

*You set a wallpaper for your iPhone but get an annoying zoom error? Today I will tell you how to set a super simple iPhone wallpaper without zooming .*

Changing the wallpaper for your iPhone is a way to make your phone more innovative and impressive. And on iPhone you can set the wallpaper for the home screen and lock screen. However, during the process of operation, many people encounter the error of the image being enlarged, which looks very uncomfortable. Therefore, to overcome this situation, **TipsMake** will share a simple and effective way to set iPhone wallpaper without zooming in.

## Instructions on how to set iPhone wallpaper without zooming

An enlarged wallpaper makes you extremely uncomfortable because you cannot see all the content in the photo you want to display on the screen. With the following **method of setting an unzoomed wallpaper on iPhone**, you will not encounter this uncomfortable situation anymore.

### Reduce image size before setting as wallpaper for iPhone

The enlarged wallpaper may be because the image you installed is too large. Therefore, you should edit the appropriate image size so that the image after setting as wallpaper is more optimized. Usually the appropriate image size to set wallpaper for iPhone is **640 x 1136**.

To edit photo size, you can *edit on the iPhone camera* or use the *image resizing application **Image Size*** . To download the application, you just need to go to **the App Store** to download and use it.

To adjust photo size on iPhone, do the following:

=> Go to **Camera** > select *the photo to edit* > select **Edit** > select the Crop feature > select *the icon to the left of the 3 dots in the upper right corner of the screen* . Then you select the size you need to adjust > select **Reset** and you're done. This is the simplest way to shrink a photo to make an iPhone wallpaper.

**Turn off the zoom feature on the iPhone screen**

Not only is the error of the wallpaper being enlarged during installation, but the error of the iPhone screen being enlarged is because you **turned on zoom mode** on your phone. Therefore, to set the wallpaper without zooming, you must *turn off zoom on the iPhone* .

*Proceed as follows:*

**Step 1 :** Go to **Settings > Display & Brightness > Select View** in the **Screen Zoom** section.

## Restart your iPhone

This is a common operation that you need to apply when you encounter any errors while using your iPhone. Software errors on the device will affect the wallpaper setting function on the device. So try turning off the power and restarting the device to see how it goes!

## Reset iPhone settings

If the above method doesn't work, reset your iPhone's settings by: *Settings* > *General* > *Reset* > *Reset* > *Reset all settings* or *Erase all content and reset*.

This will help the device restore the system and fix software errors quickly. However, you should back up your data before proceeding!

With the above tips, you probably know **how to set an iPhone wallpaper without zooming**, right? Wish you have interesting experiences on your phone!
