

SHEET function - The function returns the worksheet number value of the referenced worksheet in Excel

SHEET function: The function returns the sheet number of the referenced worksheet. Support functions from Excel 2013 onwards. Syntax: SHEET (value)

The following article introduces you to the **SHEET** function - one of the functions in the group of information functions that is very popular in Excel.

Hàm SHEET

Description: The function returns the worksheet number of the referenced worksheet. Support functions from Excel 2013 onwards.

Syntax: SHEET (value)

Inside:

- **value:** The name of a worksheet or reference to find the page number, is a required parameter.

Attention:

- The use of this function should be restricted in formulas because Excel automatically converts as needed.

For example:

Calculate the number of sheets described in the table below:

	A	B	C	D
2				
3		Hàm SHEET trong Excel		
4		<i>Nhóm hàm thông tin</i>		
5		<i>STT</i>	<i>value</i>	<i>SHEET(value)</i>
6		1	Nha_SX	
7		2	Sheet2	?
8		3	Hoa_don	
9		4	Sheet3	
10		5	Sheet1	
11				

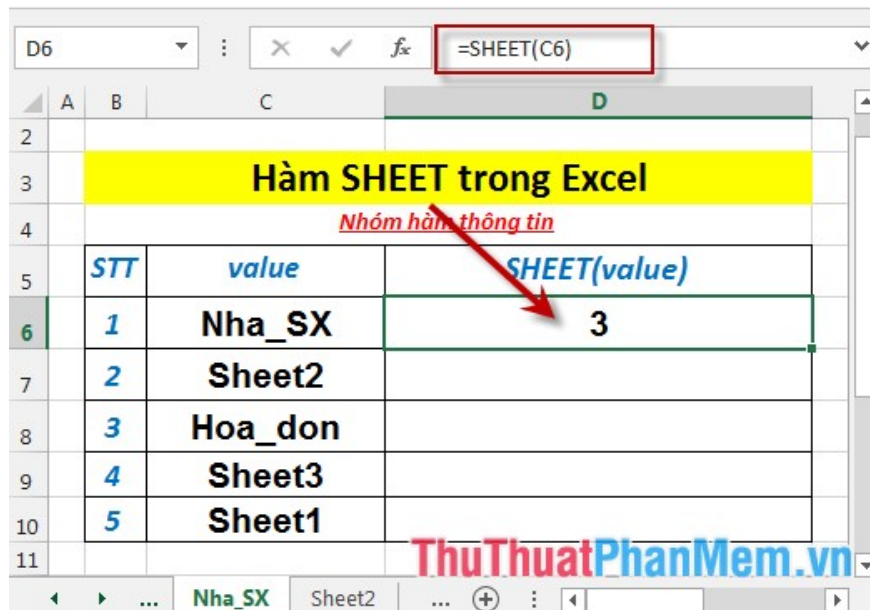

ThuThuatPhanMem.vn

- In the cell to calculate enter the formula : = **SHEET** (C6)

	A	B	C	D
2				
3		Hàm SHEET trong Excel		
4		<i>Nhóm hàm thông tin</i>		
5		<i>STT</i>	<i>value</i>	<i>SHEET(value)</i>
6		1	Nha_SX	=SHEET(C6)
7		2	Sheet2	
8		3	Hoa_don	
9		4	Sheet3	
10		5	Sheet1	
11
