Toshiba's new model has a 15.6-inch screen with 16: 9 standard, so it should be enough for the manufacturer to arrange a fullsize table with the right extra number keys for users to easily input. It also has a specially designed chassis that can withstand strong impact and protect data inside.

Satellite Pro S500 is equipped with Intel Core i3 2.13 GHz processor, 4GB DDR3 memory, 320GB hard drive and DVD read / write optical drive. The S500 has an additional machine performance adjustment button that reduces energy by up to 25%.

In addition, the device also owns standard Wi-Fi connection n, bluetooth (integrated drive some specific models), 3 USB ports, 1 eSATA / USB port. These USB ports can charge other mobile devices even when the device is turned off .

The Satellite Pro S500 is now available in the market for about 780 USD.
