4. How to know what the shortened URL contains behind without clicking on them?

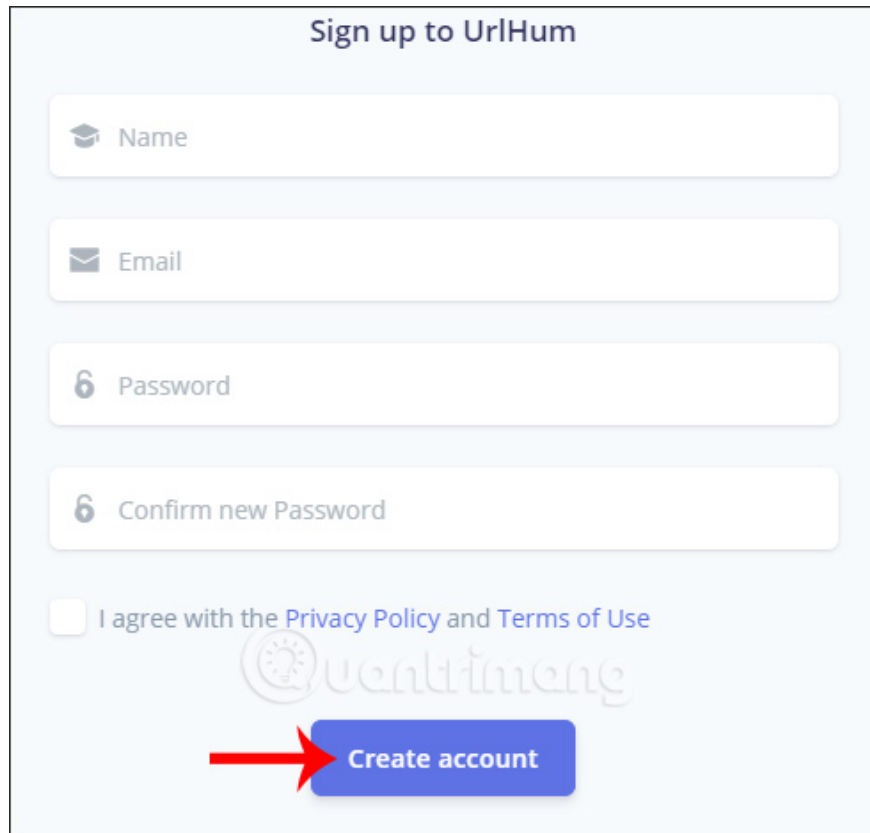

## Short link guide on UrlHum

### Step 1:

Users access the link below to open the UrlHum homepage.

`https://demo.urlhum.com/register`

At the interface you should first register UrlHum account to use more features.

Sign up to UrlHum

Name

Email

Password

Confirm new Password

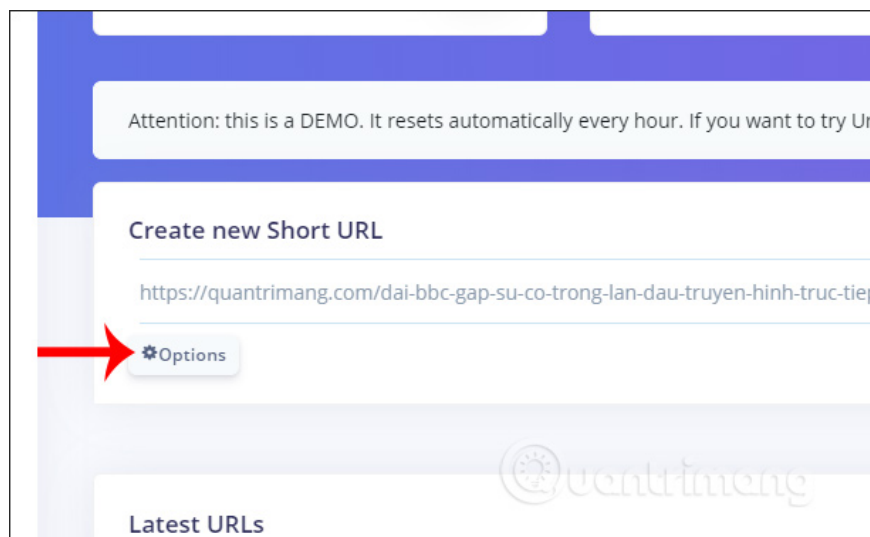

I agree with the [Privacy Policy](#) and [Terms of Use](#)

### Step 2:

After creating an account, users can use it immediately without having to confirm the account. We will paste the link we want to shorten in **the Create new Short URL box** . Then click **the Options button** to expand the options for shortened links.

Attention: this is a DEMO. It resets automatically every hour. If you want to try Url

Create new Short URL

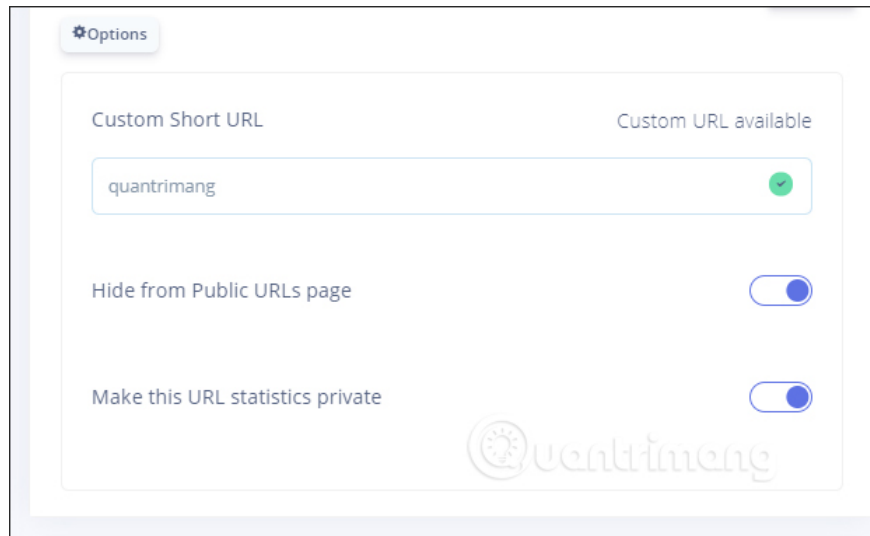

Latest URLs

### Step 3:

Below shows some additional options for users.

1. Custom Short URL: set custom name for shortened link.
2. Hide from Public URLs page: hide this URL from the public page on the service.
3. Make this URL statistics private: set URL statistics in private mode.

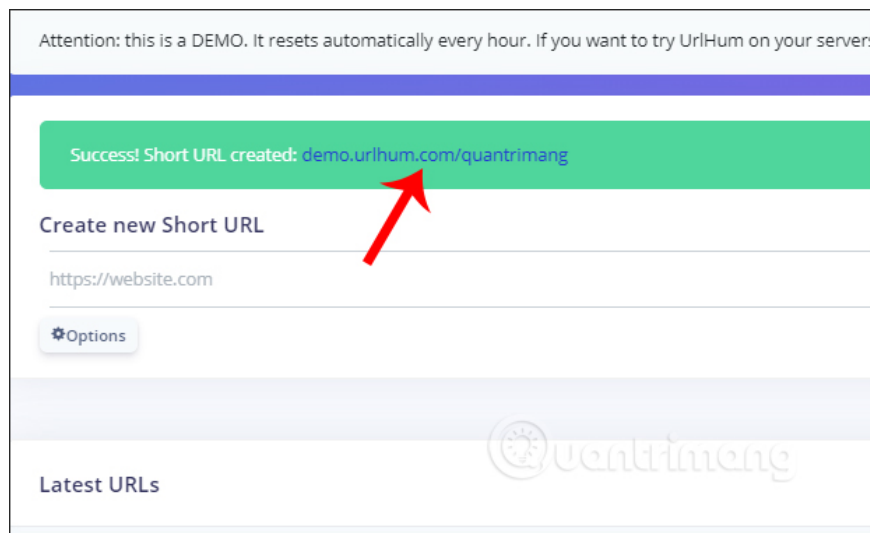

Once the link is set up, click **the Submit button** to send the link to the server.

The screenshot shows the 'Options' panel for creating a short URL. It features a text input field for 'Custom Short URL' with the value 'quantrimang' and a green checkmark indicating it is available. Below this are two toggle switches: 'Hide from Public URLs page' and 'Make this URL statistics private', both of which are currently turned off. The 'Submit' button is located at the bottom right of the panel.

#### Step 4:

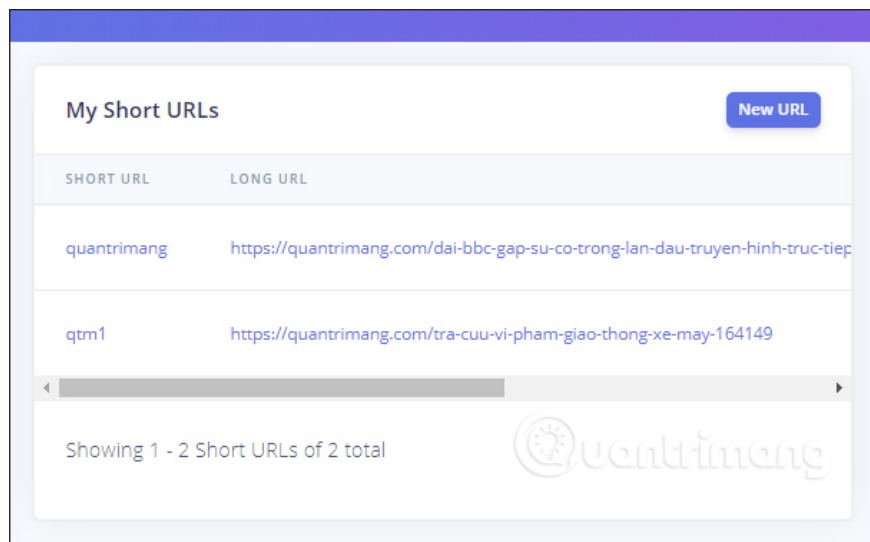

The results are displayed in **the Success message** with the shortened link as shown below. Next you proceed to shorten the other link.

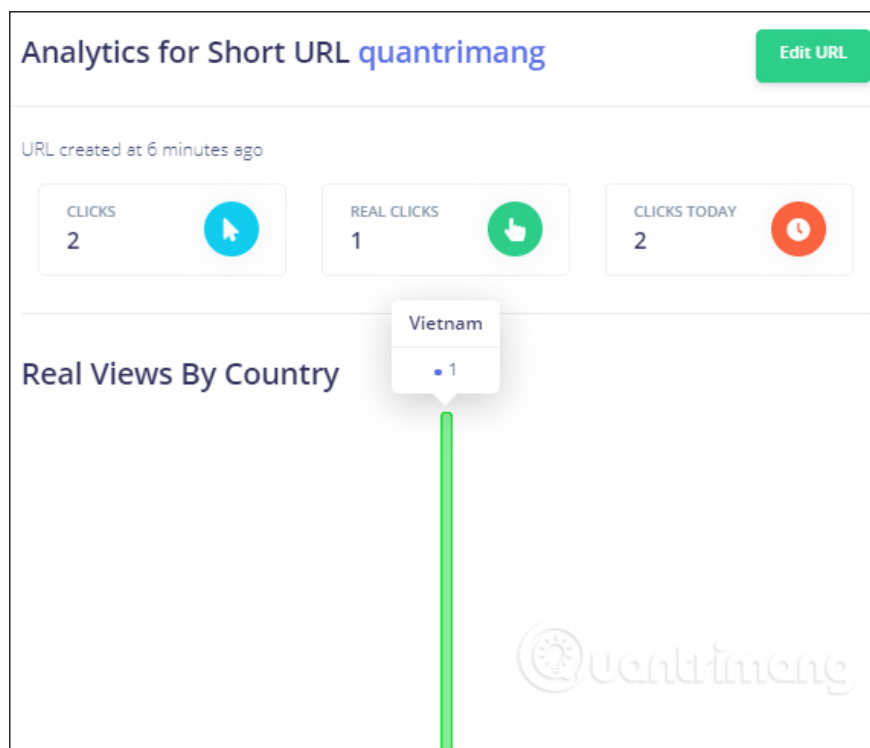

The screenshot shows the success message for a short URL. A green banner displays 'Success! Short URL created: demo.urlhum.com/quantrimang'. Below this is the 'Create new Short URL' form with a text input containing 'https://website.com' and an 'Options' button. The 'Latest URLs' section is visible at the bottom.

#### Step 5:

The links we proceed to shorten are displayed in **My Short URLs** . At this interface, users can edit, delete, shorten new links or view link access statistics. To edit the shortened link we click on the **chart icon** .

Here the link statistics are fully displayed for users to know.

The shortened link operation on UrlHum is very simple and easy to implement. All original links used and shortened links have been created into a separate interface for easy control when needed.

I wish you all success!
