I. Experience in selecting good washing machines

1. Determine usage needs

This is considered an extremely important criterion to determine before choosing to buy a washing machine. The demand here depends on the number of family members, the age and the work of each member. Because each age has different characteristics and needs.

2. Features of the machine

Features on the washing machine are quite diverse such as:

1. Drying
2. Hot water washing.
3. 3D sensor.
4. Drying.
5. Add laundry.
6. Bubble washing.

Consider what features you really need to make a reasonable decision.

3. Ability to save

If you want to save water, you should choose a horizontal cage washer. As for electricity, it is advisable to choose an Energy Star-marked device or apply Inverter inverter technology. This technology allows to change the rotation speed so it can help the machine consume 20% less energy than normal.

Washing machines are high-intensity, everyday devices, so this is a significant rate in the long term.

4. Price

This is a very important factor when choosing a washing machine. In terms of brands, domestically produced washing machines (although with international brands) are the cheapest, followed by washing machines manufactured in third countries such as Thailand, Malaysia, Indonesia .

The most advanced and highest quality is still the line of washing machines made in Japan or Europe, but their prices are also quite high.

II. Which brand washing machine should I buy?

1. Samsung washing machine
