## What is an electric fan?

**Electric fan** also known as **rechargeable fan, rechargeable fan** . is a cooling device, capable of operating even when a power failure.

In terms of design, the electric fan is quite similar to the normal table fan, however it is equipped with an extra charge or battery.

## What is the best experience to buy electric fans?

### 1. Determine usage needs

Do you have a power outage when you live? What is the frequency of power outages? How often? These are the first questions you need to answer before deciding whether to buy an electric fan or not.

If the power outage is frequent, equipping an electric fan will help you and your family members avoid the heat for a certain period of time.

### 2. Battery and battery capacity

This is the decisive factor, so the charge time of this fan. Normally an electric fan will be able to operate for at least 5 hours when a power failure occurs. With some more advanced lines, that time can last up to 10 hours or more.

When choosing to buy, make sure you can not ignore this detail to choose a quality fan.

### 3. Don't be too curious about extra features

On the current electric fans are often equipped with many extra features such as lights, alarms, timer . However, you should not be too hungry for many extra functions to do, sometimes they even make The fan runs out of power faster, does not bring the optimal cool air flow.

## 4. Select fan material

The advice for you is to find winged fans or fan cages made of ABS. This is a high quality plastic material, not only beautiful but also brings high durability while ensuring safety for users.

## What type of electric fan is good between Sunhouse and Tiross?

Sunhouse electric fans and Tiross electric fans should choose which one is a question that many people wonder. We will help you learn the main features of these two product lines, from which you can make decisions easier.

### Is Sunhouse electric fan good?
