Microtek MTK-06 towing speaker (250W)

Learn mobile pull speakers.

The portable tow speaker is a portable audio transmitter designed like a towing suitcase (about 15-35 kg in weight), most of which will have hand pulls and usually has 4 wheels to help users easily move.

Pull speaker Microtek MTK-05 (160W)

Advantages of mobile speakers:

With convenient wheels and handles, it is easy to carry speakers everywhere, without any problems. You can comfortably sing karaoke anywhere.

Time to use music and karaoke play comfortably for 4 to 6 hours due to the built-in battery. Capacity ranges from 100W - 800W enough to meet the needs of regular karaoke.

Temeisheng Q8 portable speaker

Built-in bluetooth to make the most of the ability to connect to many devices such as phones, tablets, laptops . making it easier to sing karaoke everywhere and there are many new songs updated every day . In addition to singing karaoke, loudspeaker can also listen to FM, listen to music via USB, memory card .

Disadvantages of mobile speakers:

1. Design is not aesthetic, limited when used in a luxurious living room space.
2. Less features to adjust sound and not high quality by professional karaoke.
3. If you want to sing karaoke, you need to have a network to YouTube or to connect to a television, only some of the new speakers have the function of singing karaoke directly with USB with song data available.

SoundMax M-6 speaker

Small tips to keep the speaker durable:

The maximum volume should not be turned over for a long time, because it is easy to damage the machine when the vibrating part is over capacity. It is best to use a maximum of 4, 5 hours is fine!

Should pay attention to the environment using the speaker as in a cool space, avoid places with humidity, strong winds because it is easy to cause annoying squeaks and hissing sounds. Should clean the speaker regularly.

Speaker Microtek MTK-04

Advantages and disadvantages of sound system

Seamless karaoke family on the market today there are many designs from many different brands. A karaoke kit usually includes: Amply, loudspeaker, karaoke, microphone, etc. Some more professional staging systems also have filtering and fine-tuning systems.

Advantages of sound system

Professional sound: Because it is a product line of fixed sound system at home, it should use amplifier, professional karaoke head and standard speaker system (including bass speakers, mid speakers and treble speakers) so it will give sound Perfectly powerful, exceptional sound quality, conveys natural and engaging vocals when you sing karaoke.

1. Connection: Can sing karaoke all the time with a disc without internet.
2. Capacity: From 250W to 2000W depending on the type of speaker, making it easy to choose how to suit your needs.
3. If connecting with smart TV singing to choose the source from Youtube, there will be many new songs updated every day.

Portable pull speaker Fenda T2

Disadvantages of sound system

1. Only singing in the house, unable to take a picnic outdoors, mobility is not as high as a loudspeaker.
2. If you want to sing karaoke, you need to have a dedicated karaoke disc.
3. Expensive initial investment costs for many parts such as: Speaker, amplifier, karaoke, microphone, .

4. Costly installation, many connecting wires.

Choose mobile speakers or karaoke?

Generally depending on the specific conditions you choose which products really suit you:

Select tow speakers:
