1. Instructions for cleaning the steam irons stand properly
2. Which type should be chosen between: Steam iron and dry iron?

I. What is standing steam iron?

The standing steam iron is a variation of the steam iron. The structure of the vertical steam iron consists of 1 water reservoir with capacity ranging from 1.2 to 1.5 liters; An adjustable height metal bar helps to hang clothes on the iron, a water heater to create steam, a pipe that conducts steam up and 1 iron with similar design like a shower to heat up steam and straighten clothes.

II. Advantages when using standing steam iron

Do not cause back pain when ironing

When using a regular iron, you will have to bend and bend over a long time, so it is easy to cause back pain and aches. However, this type of steam iron does not happen at all. Smart design, can easily adjust the height to match the user height, the **standing steam iron** will make you really comfortable and comfortable when doing this job.

Ergonomic design, bringing many benefits to users

The iron head is designed as a faucet, it is very convenient to handle, does not cause hand fatigue when moving, even if you have ironed continuously for a long time.

Comes with a product that usually has a hanger, you can put clothes on the hanger and iron it quickly. With a flexible changing height, the rack mount helps you use it, keeping your iron handy.

In some lines standing steam irons are also equipped with pleated tools that allow you to clamp and hold cups for trousers easily. In addition, some irons also have heat-resistant gloves, racks to iron the shoulders more simply.

Some other irons have self-cleaning, sediment discharge, calcification features that keep the water tank clean, the steam sprayed pure, free of impurities and increased durability for the iron.

Easy ironing on all fabric materials

These steam irons often have a large capacity of 1600W or more, fast steam injection rates combined with large sized steam iron to create a powerful steam stream. Since then, wrinkles on fast clothing are removed, saving electricity, effort and time. The vertical steam iron can straighten all fabrics from jean, cotton to wool, silk . without damaging and fading the fabric.

No need to use ironing board

With the traditional iron, every time you ironing, you often have to prepare a table, or cloths to put clothes on to make ironing more convenient. Many times it brings a lot of trouble such as: Be cautious, waste space, work hard or wet the lining cloth underneath.

Particularly in this line of standing iron, you can iron clothes, tablecloths, curtains . as soon as they are placed directly on the hook, rack .

You just need to select the speed of the steam spray suitable for the fabric and then put the steam iron on the fabric surface, the steam will penetrate into the fabric with a moderate level to soften and straighten the fabric quickly, without fear of ironing. The front surface wrinkles the back of the fabric like regular iron.

High safety

Standing steam iron is very safe when the base surface has a small cross section, the ability of the user to contact the soleplate during hot so that it is also much lower than the base with large cross section.

The rack with iron has a small shelf design that helps you put the iron base neatly after ironing so don't be afraid of the hot iron placed in an unstable position, prone to falling, causing burns, heat for user.

In addition to the outstanding features on the vertical steam iron is also very diverse in types and models, so that users can choose to best suit the needs of use and financial condition of me

III. Should steam iron be used?

Surely with the above sharing you have got your own answer. An iron with a smart, modern design, affordable price that comes with countless utilities, there is no reason for us to deny it.

If required, use a standing steam iron. Please refer to the top and best selling products today. Surely these will be ideal suggestions for you.
