### Why should I use a locator for the elderly?

Compared to the average person, the ability of the elderly and the brain (the age of 60 or older) to function is often worse. Therefore, the smart locator clock will be an effective tool to help children and grandchildren look after their grandparents better, giving you peace of mind when you can't be around.

In particular, for families with elderly people with dementia, forgetful often forget their home address, forget the way home . then the positioning clock is also a way for them to contact relatives, help people dearly, he quickly found his position, and let him take it in time.

The alarm function, reminder of the locator clock will remind and warn the activities and activities of the elderly in a regular and timely manner.

In addition, the positioning clocks are now equipped with the ability to monitor heart rate, movement, number of steps . extremely flexible and smart. This is not only convenient for monitoring the health status of the elderly but also helps your family promptly handle when bad situations happen unfortunately.

Besides, the SOS alert function of the locator helps alert when there is a danger of the elderly so that your family can promptly recognize and promptly deal with emergency situations.

Some smart-watch models today also install programs such as poetry, music, quizzes . to help the spirit of the elderly less boring and become more fun.
