What are the washbasin types?

The sanitary faucet is designed to help users clean the lower part of the body after solving the sadness, so that they do not have to use tissue paper and still ensure clean, comfortable and comfortable feeling.

This type of toilet washing equipment has 3 common types:

1. The first type is not very popular in Vietnam, but it can be encountered many times in some European countries. This device is in the form of a sink that looks quite like a toilet, and is placed flush with the toilet, after the settlement is completed, users will sit down to wash.
2. The second type is very popular, can almost easily be found in most toilets in Vietnam, as a portable spray. After going to the toilet, users hold and press and hold the faucet to wash.
3. The third type is very popular in Korea, Japan and is 'feverish' in Vietnam over the past time, being a smart spray. This device is added to the toilet. After solving, users will rotate the control button, the tap will automatically run out and spray the washing water, users absolutely do not have to manually handle the faucet.

Types of sanitary washers.

Characteristics of smart sanitary washers

1. The device is made of ABS plastic material with high durability, **product life can be up to 10 years** , is designed to be compact, and can be installed in all types of toilets without any extra accessories. . Installation is also very simple, users can manipulate themselves.
2. The product has **2 wash nozzles with 2 spray modes** : one nozzle for anal cleaning, one for female hygiene. Different spray speed, spraying force and spray angle are suitable for a wide range of users, just a single operation is to rotate the control button for the spray nozzle to run out and spray the wash water. Wash nozzles also have a **self-cleaning mode** to ensure hygiene.
3. Users can choose the version to use only cold water or select the version with both hot and cold water depending on demand. Hot water is taken from the top of the sink.
4. The device is **completely non-electric** so it does not worry about electricity or fear of unsafe electricity.

Intelligent, modern sanitary washbasin.

What are the advantages of smart sanitary faucets?

As a smart sanitary device, this product gives users a lot of convenience. Compare with other common cleaning methods to see how remarkable this device is!

Compared to toilet paper

Advantages of smart sanitary washbasin compared to toilet paper.

1. Smart washbasin uses water to wash, so the cleaning ability is superior to toilet paper.
2. Using washing hoses also bring a feeling of smoothness, comfort, very suitable for women, children, the elderly, avoiding the risk of hemorrhoids.
3. After being instructed, children can go to the toilet completely without the help of adults.
4. Using washing hoses will replace paper to make the toilet no longer clogged, and at the same time reduce the environmental pollution because when making toilet paper, it will have to go through the process of cutting trees for timber and discharging large amounts of wastewater and gas Industrial waste from the manufacturing process.
5. Each smart washer product has a lifespan of 10 years, but the price is usually **less than 1 million VND** . Buying one of these taps and then using them for 10 years is much more economical than the amount of toilet paper for 10 years (**if only a simple family uses 20,000 coins of toilet paper per week, in one The year has expired 1,040,000 VND!**)

Compared to the basin wash basin

Advantages of smart sanitary washbasin compared with sanitary sink.

1. The pelvic washbasin is very bulky, takes up space, while the washing-down nozzle is much smaller and more economical. Therefore, although the smart washbasins and washbasins can have similar automatic washing features, the washing device is perfectly suitable for most families in Vietnam that often have a face. Bath area is not too big.

Compared to hand-held sprayers

Advantages of smart washbasin over hand-held spray.

1. Smart tap does not need to be squeezed too long for tired hands, no need to squeeze too hard to spray, and the spraying water is not too strong to avoid burning pain like a handheld hose.
2. Smart wash nozzles are also easier to control, just rotate the button without worrying about splashing water to wet the toilet, wet the bathroom floor or disperse bacteria into the air.
3. Smart spray nozzles have some versions that allow spraying with hot water, not just hand held hose that can only cool water, so this sanitary equipment is very suitable for winter use, for people with hemorrhoids, suffering from nocturia, used for the elderly, children and for women on days when the 'aunt' visits.
4. Smart spray nozzles can also wash themselves when being trapped so they are more hygienic than hand-held sprays, so the whole family can safely use it!

Use smart wash sprays to enjoy a comfortable, modern life.

With the above information, you must also feel the smart toilet faucet is a product that should be in the family to make life more comfortable and modern as well as help protect health and protect the environment well. than.

Currently, the market offers a lot of different smart washbasin models for consumers to choose. While products imported from abroad often have high prices, currently the products **produced in Vietnam on advanced technology lines** such as **Luva Bidet** , **Hyundae Bidet** are also very secure but the price is also Very affordable, usually **less than 1 million** .

If you want to equip this family with sanitary equipment, you can order online at **META.vn** website or contact **Hanoi** hotline number **024.35.68.69.69** - **TP. HCM 028.38.33.33.66** for advice and support for the fastest

purchase with the cheapest price.
