

Should I use Ferroli water heater?

Should I use Ferroli water heater? This is a question that many consumers are interested in. To know the answer, let's find out the following article of [Quantrimang](#).

Should I use Ferroli water heater? This is a question that many consumers are interested in. To know the answer, and decide whether or not to use a Ferroli water heater, let's explore the following article from [Quantrimang](#) .

Which country is Ferroli water heater?

Ferroli is a famous global corporation founded in 1955 in San Bonifacio, Italy. Ferroli then became a pioneer in the field of thermal energy industry development and was dubbed the 'World Cooling Center'.

After more than 60 years of development, Ferroli has owned more than 30 large factories, 6 new technology research and development centers and nearly 10,000 employees and branches distributing products worldwide.

In 2005, the Group expanded its market in Asia and established Ferroli Indochina Company Limited and had a manufacturing factory in Vietnam.

Ferroli water heaters are considered the key products of the Group. In particular, the latest product line of glazed hot water bottles is produced with the most advanced technology, convenient design, easy to install in traditional or modern houses.

Ferroli is also a pioneer in researching and offering silver-coated burning bars on hot and cold machines. The product is developed based on research on the need to use products that are safe and healthy for consumers.

Should I use Ferroli water heater?

To answer this question, let's first learn about this product line. Here are some of the features of the Ferroli water heater that you should know:

Various models

Ferroli is currently focusing on 2 main product lines including:

1. Direct hot water heater: Compact size, works with resistors to bring direct hot water.
2. Indirect hot water heater: Equipped with a container capable of storing large amounts of water, the ability to heat once used many times saves more.

Own modern design

Ferroli dispenser has a compact and luxurious design, the outer shell is made of high quality, shiny plastic. The product has good thermal insulation ability, the shower part is made from stainless steel, bringing durability, beauty and luxury for the bathroom space.

Application of modern technology

Referring to Ferroli heater, it is impossible not to mention the 'Eco Care' feature. This product is equipped with an absolute safety protection system such as:

1. Safety mode independent leakage.
2. Automatic error detection mode.
3. Anti-overheating mode.
4. Explosion-proof mode.
5. Safe ground protection mode.

Diversified capacity

Ferroli's water heater products have a quite different capacity range from 2,500W to 4,000W. Combined with durable copper high-performance burners with superheating capability. In addition, glass fiber containers help keep heat well and especially save power.

Smart display

Ferroli water heater is equipped with LED screen showing parameters such as temperature, menu options, time, water cooking mode . brings convenience to users.

Large capacity

Ferroli's indirect water heaters are equipped with a large capacity of 15 to 30 liters to provide your family with a comfortable water source with advanced technology with shock-resistant power cable.

Pros and cons of Ferroli water heaters

Advantages:

1. Luxurious design
2. Large storage capacity
3. Large operating capacity
4. Absolute safety
5. Clear visual display
6. Reasonable prices

Defect:

1. Quite a time to install

Top most popular Ferroli water heater today

1. Indirect water heater Ferroli QQ 50L - Reference price: VND 3,490,000

It has a modern, luxurious design with elegant white color, suitable for many different bath styles. The product has a durable Titanium enamel kettle that acts against electrochemical corrosion, extending the service life.

Products save 30% of electricity consumption, is an economic option for every family.

Ferrolli equipped with ELCB anti-shock power cord will ensure immediate power off to minimize the hazards caused by electric shock. In addition, Ferrolli's hot water product is also equipped with a dry fire relay. Relay will automatically disconnect when the temperature in the tank is over 90 degrees Celsius and can only be operated again when there is a test of the technique to prevent the heating bar from burning.

Specifications:

1. Warranty: 24 months
2. Working temperature: 75 degrees Celsius
3. Pressure: 0.8 Mpa
4. Capacity: 50 liters
5. Power consumption: 2.5 Kva

2. Direct water heater Ferrolli Divo SSN 4.5S (BM01) - Reference price: VND 1,950,000

The water heater uses a simple and easy-to-operate button-and-rotate control system. When used, users can easily adjust the water temperature as desired, with a simple button rotation.

Besides, it also has a water flow control valve that allows users to customize the amount of water to suit their needs.

Specifications:

1. Warranty 12 months
2. Temperature: 55 degrees Celsius
3. Power consumption: 4.500W
4. Safety mode: Multi-level safety protection

3. Ferrolli QQ EVO ME 30 liter indirect heater - Reference price: VND 2,290,000

Ferrolli QQ EVO ME equipped with Mg anode bar has the effect of softening water, protecting the bowel and giving better water quality. Ferrolli experts have researched and developed Mg anode bars of larger sizes to increase corrosion time and extend the life of containers.

Besides the automatic temperature control relay, Ferrolli's hot water heater is also equipped with a dry fire relay. Relay will automatically disconnect when the temperature in the tank is over 90 degrees Celsius and can only be operated again when there is a test of the technique to prevent the heating bar from burning.

Specifications:

1. Warranty: 24 months
2. Temperature: 75 degrees Celsius
3. Capacity: 30 liters
4. Pressure: 0.8 Mpa

A bit of installation weakness will not affect your decision much. With the advantages of design, safety mode, advanced heating technology and quite attractive price, the Ferroli heater will definitely deserve to be in your family.
