

Should we buy 2-way air conditioner? Two-way air conditioner good?

Quite a number of readers have asked whether we should buy a 2-way air conditioner ? What are the benefits of 2-way air conditioner and what is the good kind? These concerns will be answered by TipsMake.com in the article below.

2-way air conditioner is a popular product in East Asian countries such as Japan, Korea, China . Quite a number of readers have asked whether we **should buy a 2-way air conditioner** ? What are the benefits of 2-way air conditioner and what is the good kind? These concerns will be answered by TipsMake.com in the article below.

What is 2-way air conditioner?

Air conditioner is an electrical appliance that is so familiar to Vietnamese families, however, most of us only use one-way air conditioner capable of cooling, not everyone knows about air conditioner 2 pm. So, what is 2-way air conditioner?

Actually, the concept of 2-way air conditioner is very simple. Unlike 1-way air conditioner, which only converts normal air into cold air, 2-way air conditioner is responsible for both functions: Cooling air when it is hot and warm air when it is cold.

2-way air conditioners are essentially the same as 1-way air conditioners, there are also hot and cold lumps, except there is an additional reversing valve to change the cooling direction of the air conditioner. Normally, in

the summer when the air conditioner is in cooling mode, the cold unit has the effect of absorbing the heat in the room thanks to the refrigerant in the indoor unit, from which the absorbed heat is moved to the hot unit so that the outdoor unit fan blows. heat out the environment to cool the fluid in the pipe. With 2-way air conditioning, when using the heating function in the winter, the opposite effect compared to the summer, the cold (in the room) turns into a hot lump to heat the air in the room, hot lump (outdoors) Turns into cold to absorb outdoor heat.

The advantages of 2-way air conditioner

Should buy 2-way air conditioner or not is a question of many customers, because the addition of heating features will definitely make 2-way air conditioner more expensive than 1-way air conditioning. However, in areas with cold winters like the North, we still have to recognize that using 2-way air conditioners has many advantages compared to using other types of heaters, heating lamps such as:

1. **Cost savings:** Instead of buying an air conditioner and a heater, you only need to buy a 2-way air conditioner.
2. **Saving electricity:** Does a 2-way air conditioner consume electricity is a wonder of many people who have never used this product. However, according to many users, the operation of two-way air conditioners is often much more energy efficient than when you use the heater to warm the room, so you will get an extra amount of energy. savings are not small monthly.
3. **Save room space:** Using a heater will cost you an extra piece of indoor space, which is probably a big inconvenience for families with small spaces. In addition, ground heaters also pose a lot of dangers for users, especially for those with children, family members.
4. **High working efficiency:** Compared with the heater, the heating efficiency of the air conditioner is much higher because the warm air is circulated in the room and regularly refreshed, ensuring that the air is both warm and clean, very beneficial. for health.
5. **Convenience:** Instead of having to maintain the air conditioner and heater at the same time or change between the two types of machines when the weather changes season, now, you only need to sit in one control seat to change the mode via remote. accomplished.

Who is suitable for using 2-way air conditioner?

It can be seen that, besides cooling, the ability to warm up is a prominent advantage of 2-way air conditioners. However, this advantage only works in the winter, so the 2-way air conditioner is usually only suitable for use in high areas, areas with prolonged cold winter such as the Han, temperate or near regions. especially the North of our country. For the hot seasons, which occupy the major part of the year, the use of two-way air conditioners is abundant and wastes resources and money.

In addition, 2-way air conditioning is also suitable for families with the elderly and young children because these are subjects with weak immune systems, often susceptible to respiratory diseases during the transition period or when it is cold. . Therefore, the use of 2-way air conditioners will help the indoor air to be always in a balance, beneficial to the health of this group.

In addition to the cost disadvantage, some 2-way air conditioners can cause skin dryness for users, so you should buy two-way air conditioners from reputable brands and integrate additional functions. aids such as moisture retention . to limit this. But there will be many people who do not know which good and reputable 2-way air conditioner to buy, so we will give you some of the brands and products suggested in the next section of the article.

Some kind of good 2-way air conditioner

Mitsubishi 2-way air conditioner

Mitsubishi is a world-renowned electronics and refrigeration brand, established in Japan and has a history of more than 100 years of development. To date, Mitsubishi remains a strong, quality brand that satisfies many customers around the world.

Air conditioner is not one of Mitsubishi's key products, but it is still trusted by many customers because of the technologies and utilities that it brings. If you are wondering whether good two-way air conditioner is good, please immediately refer to products from Mitsubishi brand.

2-way air conditioner 9000BTU Mitsubishi Electric Inverter MSZ-HL25VA

Two-way inverter MSZ-HL25A applies PAM technology to help this air conditioner use up to 98% of the power supplied, combined with the DC inverter motor to control the outdoor unit's fan blades, allowing the machine to automatically adjust capacity to save more electricity. Products heated and cooled are quite fast, combined with deodorant, bactericidal through Nano Platinum filter helps the air in your home to be fresh, pleasant, even in the cold winter.

Inverter Mitsubishi Heavy 2-way Inverter 12000BTU SRK / SRC35ZSPS-S5

Mitsubishi Heavy Air Conditioner SRK / SRC35ZSPS-S5 has a capacity of up to 12000BTU suitable for rooms with an area of 20 - 25m². Based on the "Jet Flow" principle of jet engine technology in the manufacture of turbine blades, the CFD (Computational Fluid Dynamics) technology of Mitsubishi Heavy air conditioners is considered an advanced technology, high energy efficiency. , produces a large flow of air and radiates to every corner of the room with the lowest power consumption. Thanks to this, the machine can quickly cool in the summer and efficiently heat in the winter

Panasonic 2-way air conditioner

Panasonic is one of the leading brands in the field of refrigeration, if you do not know which 2-way air conditioner to buy, then Panasonic will be a perfect choice in the high-end segment. The reason for Panasonic's 2-way air conditioner is often higher than the average price because it is very hard to improve both in design and

technology. Panasonic air conditioner products are often quite beautiful, luxurious and elegant, unique technology that helps bring you a stable and clean airflow, good for the health of users.

Panasonic 2-way air conditioner 12000BTU CU / CS-YZ12SKH-8

Panasonic 12000BTU CU / CS-YZ12SKH-8 air conditioner belongs to the two-way air conditioner, which not only brings a cool breeze in the summer, but also brings a warm space for your family in the winter. Therefore, you do not need to pay an extra cost to buy heaters anymore. Panasonic 2-way air conditioner uses modern inverter technology, helps the machine operate steadily, save maximum power and be able to reach maximum capacity right at startup to make room temperature warm or cold quickly Quick according to the set temperature.

2-way air conditioner Panasonic Inverter 12000 BTU CU / CS-Z12TKH-8

The highlight of Panasonic CU / CS-Z12TKH-8 air conditioner is in AEROWINGS technology. With this technology, Panasonic's 2-way air conditioner is equipped with two flexible flaps, which help blow and concentrate the airflow for efficient cooling or heating of an area up to 25m². These wings can move and concentrate airflow upward, passing through filters to clean bacteria and dirt and then blow down the room to create a fresh, clean and even airflow throughout the room.

Daikin 2-way air conditioner

Daikin Group is one of the largest air conditioner manufacturers in the world and the only manufacturer of integrated air conditioners in the world. It is also the first air conditioner manufacturer in Japan to be granted ISO 9001 international certification for quality management. Daikin's air conditioner products are of high perfection, world-class technology and integrated utility features to bring you the best experience when using the product. This is one of the air conditioner brands that many people recommend when asked about which two-way air conditioner is good.

Daikin 2-way air conditioner Inverter FTTHF35RVMV / FTTHF35RAVMV 12000BTU

The highlight of Daikin's FTTHF35RVMV / FTTHF35RAVMV Inverter product line is the use of Coanda effect - for airflow up to 9m away and can control the airflow moving close to the surface of the wall or ceiling in the room, minimizing airflow. Blow directly into the body. Cooling power and 2-way heating are 980W, amperage is 4.6A so extremely energy saving for you. In addition, Daikin 2-way inverter FTTHF35RVMV / FTTHF35RAVMV is also popular because it uses environmentally friendly R32 gas (air conditioner R32 does not cause ozone depletion and has low Earth heating index.).

Daikin 2-way inverter 1.0 HP FTTHF25RVMV

With the cooling capacity of air conditioning and heating 1 HP - 8,500 BTU air conditioning 2 pm Daikin Inverter 1.0 HP FTTHF25RVMV choices fit the room has an area of 15 m² (30 to 45 m³). Inverter air

conditioning technology combined with Eco mode helps the machine operate smoothly and significantly save electricity costs per month for your family. In addition, the air conditioner also has a dehumidifying function, which can replace a dehumidifier in hot days to save costs for your family.

It can be seen that for families with the elderly and young, living in areas with prolonged cold winters, this is definitely an extremely useful product to help make life more comfortable. Through the information just now, surely you have decided whether to buy 2-way air conditioner as well as refer to some good 2-way air conditioner companies?
