

Should you buy the Samsung Galaxy M62 phone?

The Samsung Galaxy M62, known as a mid-range phone in the M series, is attracting a lot of attention with its massive 7000mAh battery. Is this a significant advantage that makes the Samsung M62 a popular choice? Let's find out in the article below.

Boasting impressive specifications, especially a battery life of up to 7000 mAh - the largest among mid-range smartphones, coupled with the "in-house" Exynos 9825 chip that previously proved successful in the flagship **Galaxy Note 10 series**, and a vibrant AMOLED display, **the Samsung Galaxy M62** promises to be one of the top choices in the 10 million VND price segment for officially distributed products.

Should you buy the Samsung M62?

Should you buy the Samsung Galaxy M62 phone?

1. Incredible battery life

Yes, with a battery capacity of up to **7000 mAh**, you can use the Samsung Galaxy M62 continuously for 2 days with normal tasks without worrying about running out of battery. Despite its large battery capacity, the M62 only takes about 2 hours to fully charge thanks to **25W fast charging technology**, which is quite good.

2. Impressive design

To accommodate its large battery, the Galaxy M62 features a **6.7-inch screen**, and like other mid-range phones, the Samsung M62 has an all-plastic exterior. However, thanks to its eye-catching laser-gradient finish and

several color options, the M62 still feels quite premium.

3. Premium Super AMOLED display

Despite being positioned in the mid-range segment, Samsung is generous with the M62, equipping it with a **6.7-inch Super AMOLED screen**, **Full HD+ resolution**, brightness up to 420 nits, and a 60Hz refresh rate. With this screen, you can comfortably enjoy 2K content. In particular, the blacks on the M62 are very deep, optimizing contrast, and combined with high brightness, users can confidently use the M62 even in bright sunlight.

4. High-quality camera

The back of the Galaxy M62 features a quad-camera setup including a **64MP main camera**, a **12MP** ultra-wide-angle lens, and two **5MP** macro and depth sensors. With this camera system, the M62 can adequately meet almost all common photography needs, from close-ups and wide-angle shots to night photography and portraits.

The image quality from the front camera on the M62 is comparable to, and even slightly better than, photos taken with the Mi 10i's 108MP camera. In addition, the 32MP punch-hole selfie camera will surely satisfy users with its detailed images, stable focus, good bokeh effect, and natural-looking beauty enhancement algorithm. Furthermore, the M62 can stably record 4K video at 30fps or Full HD video at 30fps.

When it comes to Samsung's camera quality, the S21 series is considered a masterpiece, boasting a 108MP camera and up to 100x zoom. If you're currently wondering whether or not to buy the Samsung Galaxy S21, you can refer to the article below to help you make your decision:

5. Powerful performance

Powered by the Exynos 9825 chip, which was highly successful in Samsung's 2019 flagship Galaxy Note 10 series, the M62 boasts incredibly powerful performance. From basic tasks like web browsing, making calls, and sending messages to more demanding tasks like high-resolution gaming, everything is incredibly smooth. Even the single-core and multi-core benchmark scores of the **Exynos 9825 chip** surpass competitors in the same price range, such as **the Snapdragon 750G** or **Dimensity 800U 5G** .

6. Some products in the same price range

At a price of around 10 million VND for genuine products, users can also consider and choose between the Samsung Galaxy M62 and the following products:

Oppo Reno 5 5G - 10,990,000 VND

Samsung Galaxy Note 10 Lite - 10,490,000 VND

Oppo Reno 4 Pro - 10,490,000 VND

iPhone SE 64GB (2020) - 10,390,000 VND

Redmi K40 Pro - 10,150,000 VND

If you're looking for a smartphone with long-lasting battery life, enough to meet your all-day work needs, along with a good entertainment screen, impressive camera, and powerful performance, then the Samsung Galaxy M62 is probably one of the best choices available right now.

Besides, for this price, you can also choose another Galaxy A Series smartphone that supports 5G to experience faster web browsing and internet access. Or if you are interested in or wondering whether you should buy the Samsung Galaxy A52s, please refer to the article here.
