

Should you buy the Samsung M51 phone?

The Samsung Galaxy M51 is one of Samsung's phones that is attracting a lot of attention thanks to its large 7000mAh battery, Super AMOLED screen, and impressive camera setup. If you're wondering whether you should buy the Samsung M51, check out the information here.

The Samsung Galaxy M51 is one of the phones that many buyers are most hesitant about because of its modern, classy design, as well as its powerful configuration and outstanding performance. To learn more, you can refer to TipsMake's reviews **of the Samsung Galaxy M51** here and make your decision.

Is the Samsung Galaxy M51 worth buying?

Table of Contents:

1. Samsung Galaxy M51 Screen Structure .
2. Samsung M51 Specifications .
3. Camera Information .
4. Good Connectivity and Durability .
5. Should You Buy the Samsung Galaxy M51 ?

1. Screen structure of the Samsung Galaxy M51

Standing out from its Chinese competitors or even Apple, Samsung generously equipped its mid-range phone with a **6.7-inch Super AMOLED+ display** boasting a resolution of 2400x1080. The M51's screen-to-body ratio

of 91%, combined with a 20:9 aspect ratio, ensures a visual, entertainment, and movie-watching experience that can satisfy even the most demanding customers.

2. Samsung M51 Specifications

While Samsung typically uses Exynos chips for other mid-range phones – a chip that has received quite a few negative reviews from the market – the M51 once again gets preferential treatment by using a Qualcomm chip.

Although the **Snapdragon 730G chip** isn't new, its performance, combined with 8GB of RAM and a 7000mAh battery in the M51, ensures that all tasks, from basic to gaming, can be handled smoothly and reliably within its price segment.

3. Regarding the camera

The camera quality on Samsung smartphones is undeniable, having been proven by users for a long time. However, the M51 stands out from other devices, even its siblings, because it's equipped with a 64MP main camera using a Sony IMX682 sensor, combined with a wide-angle camera and two 5MP depth and macro sensors. This camera setup is perfectly capable of producing artistic photos and offers extremely high versatility for those who enjoy experimenting and creativity.

4. Excellent connectivity and long-lasting performance.

The 7000mAh battery comes with 25W fast charging via a USB Type-C port. According to Samsung, the M51's battery capacity can provide 34 hours of continuous video playback, 64 hours of talk time, and over 182 hours of continuous music playback. You can also use two SIM card slots and a Micro SD card slot simultaneously to increase storage and communication capabilities with the Samsung M51.

5. Should you buy the Samsung Galaxy M51?

With its ultra-wide-angle camera, 7000mAh battery, Snapdragon chip instead of Exynos, Super AMOLED+ display, and up to 8GB of RAM, the Samsung M51 is perhaps the most worthwhile phone to buy in the sub-10 million VND price range for officially distributed products.

If your needs are for entertainment, watching movies, and a durable device that can comfortably last all day, a phone with a beautiful screen and good specifications like the Samsung M51 is definitely not a bad choice.

Besides **the Samsung Galaxy M51**, you can also check out other phone brands at the same price point here.

Oppo Reno 5 Marvel: 8,230,000 VND

Vivo V21 5G: 9,490,000 VND

Galaxy A52: 9,290,000 VND

Oppo Reno 4 Pro: 9,990,000 VND
