

Simple steps to make a snow globe for your baby

From simple objects like glass jars, you can create a lot of unique and fancy toy products. To better understand, let's explore the steps on how to make a beautiful handmade snow globe here.

Any child likes to have new toys but they quickly get bored of that toy. So why do parents not think about making their own new toys by themselves with the main ingredients from household items? If any parents do not know how to make their favorite toys for babies, please see how to make snowballs.

Discover the steps to learn how to make a beautiful handmade snow globe below.

You need to have:

1. A bottle or a glass jar with lid
2. Plastic adhesive
3. A small plastic animal model that can be put into a jar
4. Clean water

5. Glycerin solution
6. Purl, small colorful plastic beads

Step 1: Open the lid and attach the glue to the small plastic animal model and place it inside the bottle.

Step 2: Pour an equal amount of clean water and an equal amount of Glycerin solution into the bottle.

Step 3 : Add extra purl.

Step 4: Twist the cap with the small animal model attached.

And the job is complete!
