

Simulate face transformation on iPhone with Face Story

In the previous article, TipsMake.com introduced a funny music video processing application on your phone that will help you to create videos made by me. Today, we will share with you another funny application on iPhone, called Face Story. With this application, you can simulate the change of someone's face in the form of a composite video from existing photos. Please consult.

In the previous article, TipsMake.com introduced the humorous music video processing application on your phone to satisfy you "creative" should the "made by me" videos. Today, we will share with you another funny application on iPhone, called Face Story. With this application, you can simulate the change of someone's face in the form of a composite video from existing photos. Please consult.

Download Face Story for iOS

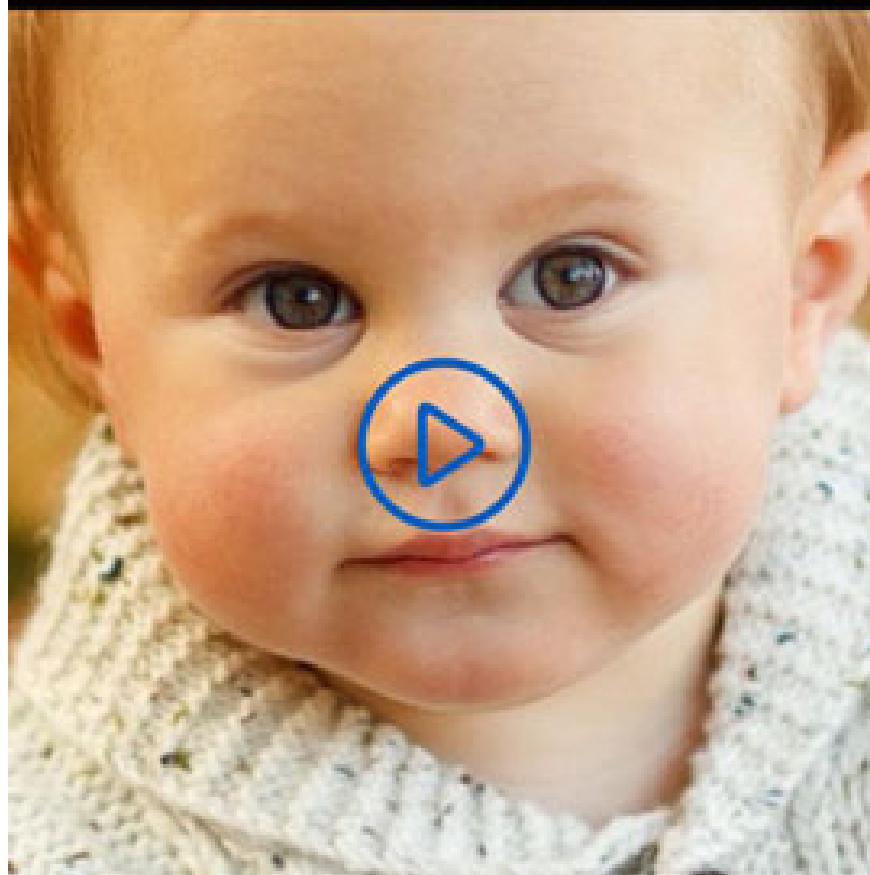

Note : You need to prepare at least 2 photos available or shoot from the camera.

Step 1:

From the main interface of the application, click on the plus sign in the lower right corner to select a photo (*you can take a photo with the camera yourself or take an existing photo in the gallery*).
