

SkyDrive supports viewing animations

Microsoft on July 30 updated the SkyDrive data store on its web site with many new enhancements, including the addition of animation (* .GIF).

Microsoft on July 30 updated the SkyDrive data store on its web site with many new enhancements, including the addition of animation (* .GIF).

According to *Neowin* , the new version of SkyDrive also supports viewing high resolution images on high DPI screens. Specifically, SkyDrive will automatically assess how the screen is viewing the saved image on SkyDrive with DPI resolution, it will give the corresponding image quality.

SkyDrive has just got a new version on the web

Besides, SkyDrive also for the first time supports viewing dynamic images (* .GIF), allowing users to experience live funny images without having to go through the third application.

In addition, **SkyDrive** adds file sharing features saved on this cloud service in the form of " *edit support* ". That is, users can share data with their friends and give them the freedom to edit documents without having to enter passwords into SkyDrive.
