

# Smartphone Gaming 16GB RAM, 1TB memory costs only 10 million, making the Galaxy S23 Ultra 'bow its head'

Redmi has just announced an additional version for its flagship gaming phone line with numbers that scare the Galaxy S23 Ultra, but the resale price is only around 10 million.

Today, in its home country of China, Redmi has officially added a version with 16GB RAM and 1TB memory to the Redmi K60 series. This is the highest version of the Redmi K60 series and also the highest in the smartphone village today, far exceeding the 12GB/1TB figure of the highest version of the Galaxy S23 Ultra. Previously, Redmi K60 only had 16/512GB version.

Notably, Redmi K60 16GB + 1TB version has a listed price of 3599 Yuan in China, equivalent to about 11.9 million VND, but is being discounted to only 3099 Yuan, equivalent to 10.3 million VND. If launched in Vietnam, the Redmi K60 16GB/1TB will only be the same price as the Galaxy A73 5G or less than half the price of the Galaxy S23 Ultra. The first purchase of the new Redmi K60 will start at 8 pm China time tonight.

Redmi K60 launched in December last year aimed at users who demand high performance for the most comfortable gaming. Therefore, Redmi K60 is strongly equipped with screen, processor chip with RAM, internal memory for an accessible price.

Specifically, the Redmi K60 has a large 6.67-inch 2K display with a 120Hz refresh rate. It offers outstanding picture quality with a maximum brightness of 1400nit, support for 68.7 billion colors and P3 color gamut. The device also has an in-display fingerprint sensor for convenient unlocking. Although not as good as the Galaxy S23 Ultra, it is also a 9 one 10 competitor.

Beneath the sleek design, the Redmi K60 is equipped with a reliable and less hot Snapdragon 8+ Gen 1 chip. Of course, the chip comes with LPDDR5 RAM and UFS 3.1 storage, ensuring strong performance. The Redmi K60 also contains a large 5500mAh battery that supports 67W wired fast charging and 30W wireless charging, allowing extended use without frequent recharging.

In terms of imaging capabilities, although not a strong point, the Galaxy S23 Ultra's price competitor also has a 60MP main camera with optical image stabilization (OIS), providing excellent image stabilization for photos. sharp and clear image. The camera system also includes an 8MP ultrawide lens and a 2MP macro lens for versatile shooting options. The device runs on MIUI 14, based on the latest Android 13 operating system, offering a user-friendly interface and a wide range of features.

In markets outside of China, the Redmi K60 is marketed as the Poco F5 Pro. The series is also available in configurations with up to 16GB of RAM and 512GB of storage. In Vietnam, both Redmi K60 and Poco F5 Pro can be purchased as portable with prices starting at VND 10,850,000 for the 8/256GB version or 11,750,000 for the 12/256GB version. Higher versions are not available and must be ordered.
