

Smartphone is expected to launch in 2021

With the rapid development of the smartphone market today, there are certainly devices to look forward to in the near future. Soon we will be holding hands-on the latest phone products from reputable manufacturers.

In this article, TipsMake will synthesize a list of smartphones that are expected to dominate the market by 2021.

1. Samsung Galaxy S21 and S21 Ultra

Samsung may turn to high-end mid-range smartphones with the Galaxy S21. The machine has an interesting camera cluster next to the side of the machine. The 6.2-inch flat display on the S21 and the 6.7-inch on the S21 + will be launched together on January 14.

Samsung's next generation of smartphones has leaked quite a lot of information. The launch event on January 14 has been confirmed by the company, we also expect the Galaxy S21 Ultra with a larger battery, a camera with more resolution and inside with a 5nm chip from Exynos or Snapdragon 888. The large camera cluster design located on the edge of the device has also leaked, perhaps similar to the S21 and S21 +, bringing a newer look to Samsung.

2. Nokia 7.3 5G

Nokia has added another mid-range 5G phone to the selection list and there are rumors that the Nokia 7.3 5G will use new hardware Qualcomm Snapdragon 6905G or MediaTek Dimensity. Nokia has also confirmed that it is developing more mid-range 5G phones so we can certainly expect more devices in the future.

3. Nokia 9.3 PureView

Rumors about the new flagship of Nokia have been around for about a year, but so far there has been no sign of this product. Nokia is expected to hold the launch event of many new devices in November, although the Nokia 9.3 PureView is on the list but according to some documents, the phone company may also launch the Nokia 10.

4. Huawei P50 Pro

The Huawei P50 Pro is expected around March or April 2021. We didn't expect the P40 Pro too much, but there is reason to expect the 6.6-inch P50. Maybe this year Huawei will focus a lot on its Harmony operating system.

5. Flagship of LG

LG says that it is producing a flagship smartphone that will launch in the near future, possibly in Q1 2021. According to a little information, LG's flagship is probably based on its V series.

6. OnePlus 9, 9 Pro and 9E

OnePlus launches its products quite often and OnePlus 9 will probably be released sometime in spring 2021. According to some information, this set of devices will still have the traditional OnePlus 9/9 Pro and will there is also an affordable 9E version. The OnePlus 9 Pro looks quite similar to the Samsung Galaxy S20 FE as seen in some images leaked on the Internet.

7. Oppo Find X3 Pro

Oppo has a quite successful flagship smartphone in 2020, the Find X2 Pro, we also expect success to continue in 2021. Release date is expected around Q1 or Q2 2021, Find X3 Pro will have a 6.7-inch screen, running Qualcomm Snapdragon 888 chip and an upgraded camera cluster. Two 50MP wide-angle and super wide lenses, supported by 13MP zoom lens and 3MP macro lens.

8. LG Velvet 2

LG will announce the launch of the LG Velvet 2 around March 2021 with the Snapdragon 700 processor. Also we don't have much news about this new LG product yet.

9. Samsung Galaxy Z Flip 3

Samsung is focusing a lot on the flip phone so we have the right to expect a new Flip in 2021. This device will be released independently from the Galaxy S series, so it should probably be introduced around June 2021. or later. According to some information, the display will be updated to a 120Hz refresh rate.

10. Samsung Galaxy Z Fold 3

The next generation of the Z Fold series will be Samsung's next folding flagship. Users expect Samsung to add the S Pen to the product set this time.

11. iPhone SE Plus

As soon as the iPhone SE launched in 2020, there were a lot of rumors surrounding the larger iPhone SE model. The iPhone SE actually carries the design of the iPhone 8, so there's no way this mid-range iPhone model doesn't have a Plus version. We have the right to expect the iPhone SE Plus from Apple.

12. iPhone 13

iPhone 12 has only been released for a few months, we have heard some rumors about the Touch ID system under the screen. Everything will appear in September 2021.

13. Xiaomi flip phone

Xiaomi has introduced a number of folding screen prototypes in the past and it will probably come true in 2021.
