

Smartphone POCO F2 Pro launched, using a 20 MP camera 'retracting'

The smartphone brand POCO has just launched its latest product, POCO F2 Pro, in an online event on the afternoon of May 26.

In 2018, when the POCO F1 model was launched immediately, it was awarded the Flagship Killer by *GSMarena* technology site, with a great configuration despite being sold at a low price. At that time, more than 1.64 million POCO F1s were sold globally.

Regarding the newly launched POCO F2 Pro version, the product owns the Qualcomm Snapdragon 865 chip, the most powerful 5G processor on the market today. Combined with eight Kryo 585 cores and Adreno 650 GPU, both offer 25% improved performance over the previous version, providing optimum performance for seamless connectivity with users.

In addition, with LiquidCool Technology 2.0 cooling technology, POCO F2 Pro features the largest cooling chamber on the market, large multi-layer carbon plates to increase overall cooling performance and individual carbon coating on locations. or the most overheated. This solution keeps the device in a cool state, especially in the SoC area and the phone surface.

The salient features of POCO F2 Pro

In addition to performance and gaming experiences, POCO F2 Pro also features popular features like on-screen fingerprint sensor, Corning Gorilla Glass 5 on both sides, infrared port and audio jack. 3.5mm is also kept for a whole experience.

With a contrast ratio of 5,000,000: 1 and brightness of 500 nit (typ) / 800 nit (HBM), the screen of POCO F2 Pro has top display quality. Regardless of the time of day, you can fully enjoy the excellent viewing experience through the 6.67-inch AMOLED screen.

For the camera, the device is equipped with four impressive 64 MP camera on the back, the main camera uses Sony IMX686 sensor to help bring high-detail images. Besides, the 123-degree wide-angle camera delivers impressive landscape photos. It is also equipped with a 5 MP macro camera and a field-of-view sensor that saves

super-close-world photos and portraits with a background that has a class-level background effect to bring out beautiful images in every context. .

On the front of POCO F2 Pro is equipped with a 20 MP pop-up camera with multicolor notification lights, this solution helps reduce the thickness of the screen bezel, while also keeping the screen integrity without compromising on quality. amount of camera. The ability to shoot slow-motion movies at 120 frames per second to help create cinematic videos.

POCO F2 Pro has a 4,700 mAh battery, which meets the needs of high intensity. Products equipped with fast charging capacity 30W, can power the device to 64% in just 30 minutes and 100% in 63 minutes.

In Vietnam market, POCO F2 Pro is sold at VND 12.49 million for a version equipped with 6 GB of RAM and 128 GB of internal memory or VND 14.99 million for an 8 GB version of RAM and 256 GB of internal memory. .
