You are looking for the software to insert text into images simply and effectively to help you insert text into pictures as you like.

Below are instructions on how to insert text into images using free fotor and ultimate paint software.

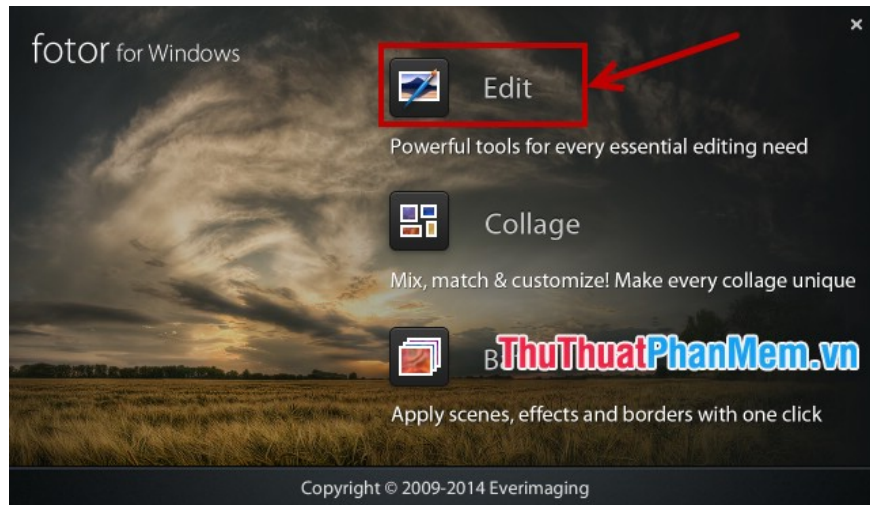

Fotor

Download Fotor here

Fotor is a software that helps you insert text into photos as well as free photo editing. To insert text into pictures with Fotor software, do as follows:

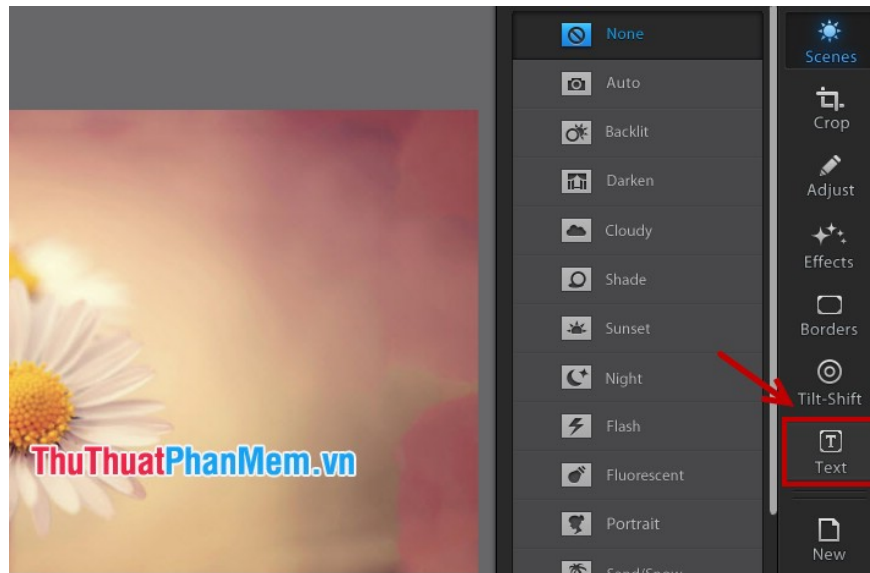

Step 1: Start Fotor by the icon on the Desktop or in the **Start Menu** , the first interface appears, select **Edit** to enter the image editing interface.

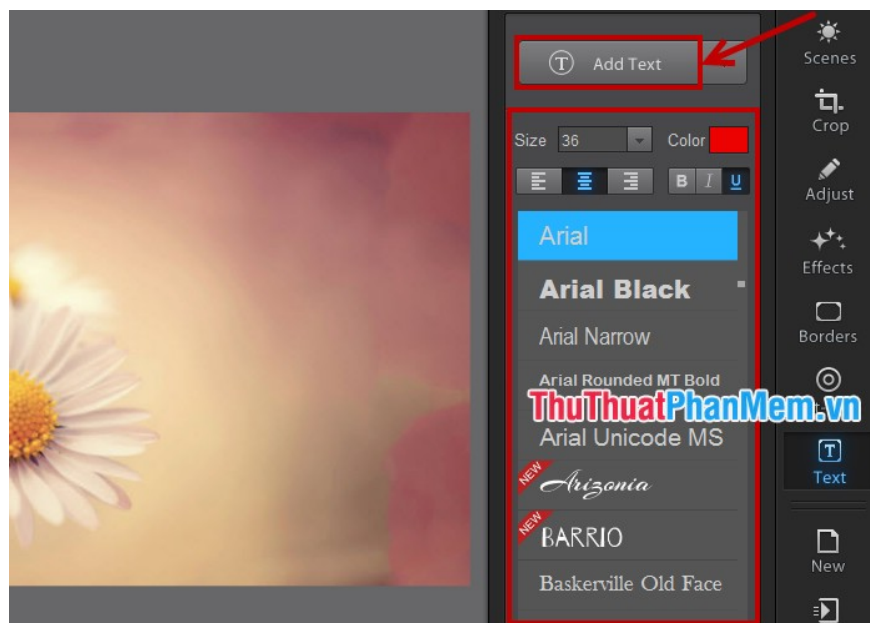

Step 2: Left-click **Click here to Start** in the middle of the interface, or select **File -> Open** (**Ctrl + O** key combination) to select the image to insert text. Fotor supports many different image formats.

Step 3: The software supports a lot of photo editing features you can find out if you want. To insert text into the image, select the **Text** tool in the tool list on the right.

Step 4: After selecting **text** , then appear the options of **Text** on the side, you select the font size in the **Size** , font color in the **Color** and bold, italics, underline, align left, center right alignment as well as the font in that option. After setting up, click **Add Text** to add text to the image.

Step 5: A text box appears on the image, you place the cursor on the frame and enter the text you want.

Step 6: You can edit the text in the **Adjust** dialog box : opacity in the **Opacity** , rotate the text in the **Rotate** , shadow in the **Shadow** .

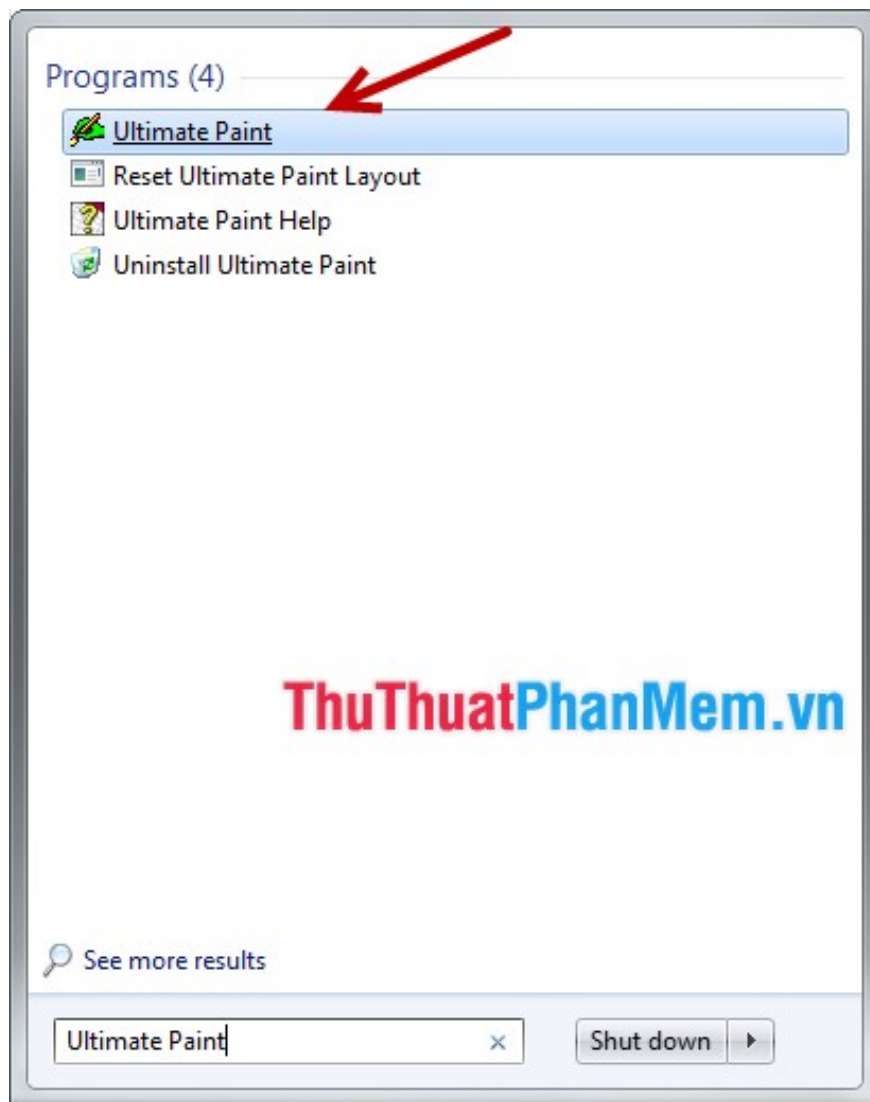

So you have inserted the text into the image as you like.

Ultimate Paint

Download Ultimate Paint here
