

Solve the Error of Photos on Facebook being Rotated Horizontally in 1 Minute

Photos on Facebook are rotated horizontally, making it difficult for you to review the images after uploading them to Facebook. So how to fix this problem?

Photos on Facebook are rotated horizontally, making it difficult for you to review the images after uploading them to Facebook. So how to fix this problem?

You are someone who often has the habit of uploading personal photos on Facebook to share with friends and relatives or to satisfy the spirit of virtual living. However, sometimes you are extremely uncomfortable because the error of **photos on Facebook being rotated vertically or horizontally** makes viewers have to crane their necks to see the full photo. So how to fix this situation? Please join **TipsMake** to see the information below.

Why are photos on Facebook rotated horizontally?

Photos on Facebook are rotated horizontally due to the following reasons:

You are opening rotation mode on your phone, so when you open the application, Facebook is rotated horizontally

Phone software errors affect Facebook activities.

Because you set the mode to allow Facebook to edit system settings

Due to an error from Facebook

Fix the error of photos on Facebook being rotated horizontally

Don't worry too much about the error of viewing photos on Facebook being rotated horizontally. Because you can handle it yourself with the simple **tips** I share. Here is how to rotate photos on Facebook that you should apply:

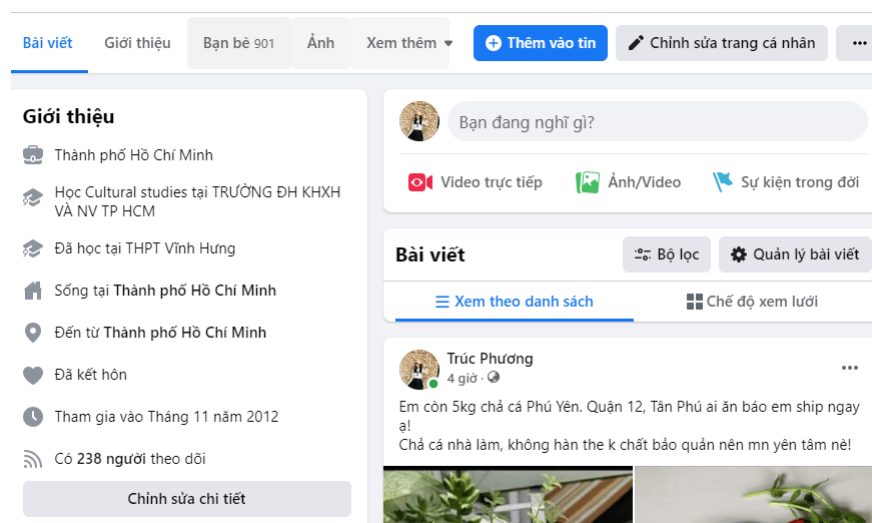

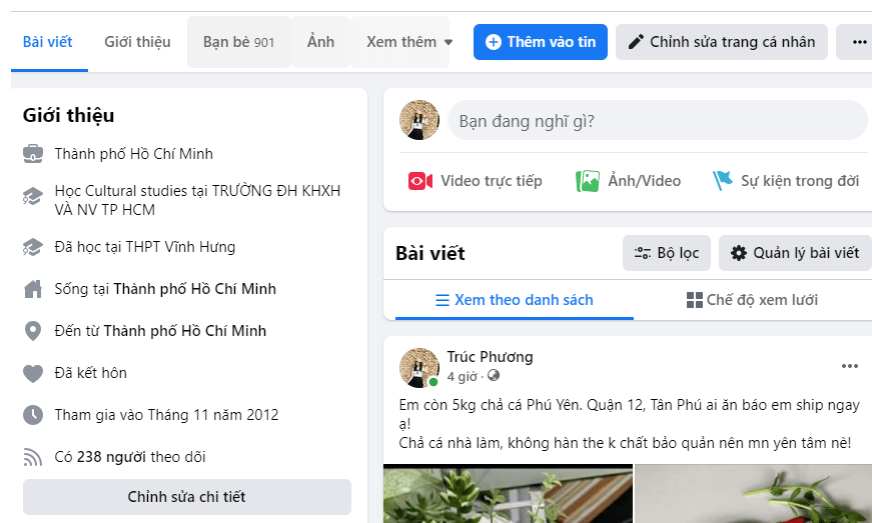

How to rotate photos on Facebook

This is a method you can only do on a computer. And currently there is no way to rotate photos on Facebook using your phone unless you rotate the photo before uploading it.

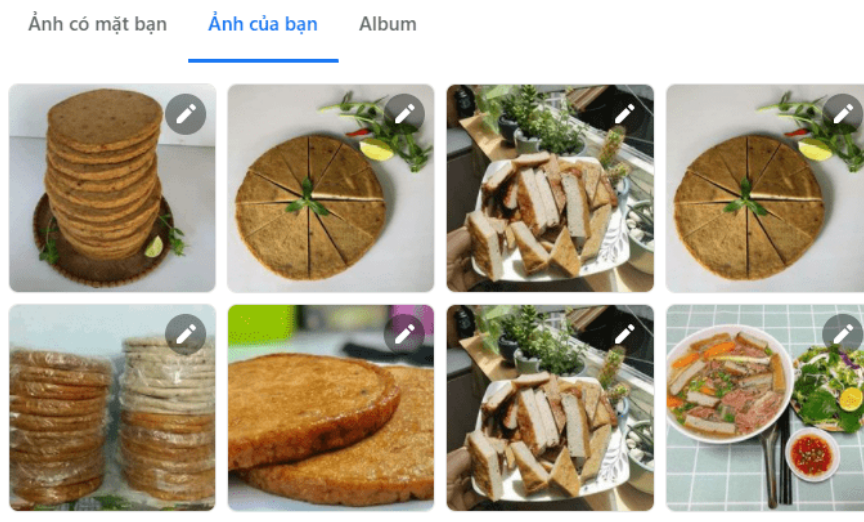

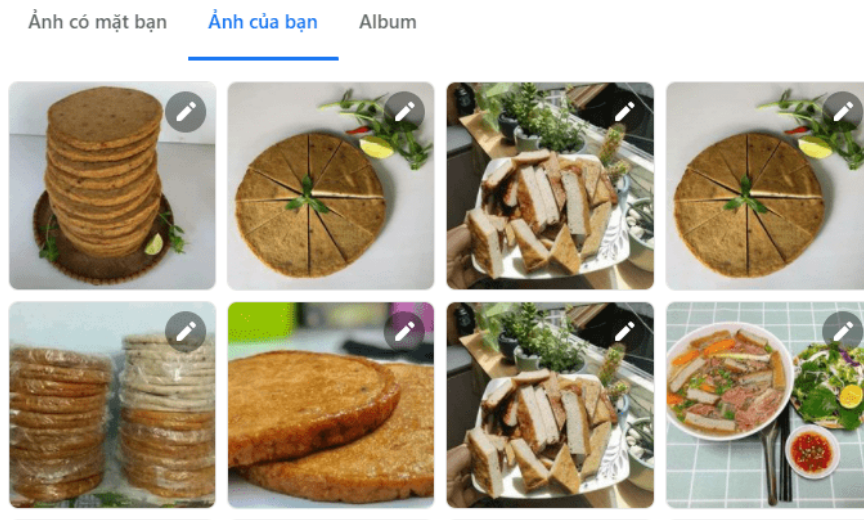

Furthermore, with this method you can only rotate the images you uploaded to Facebook. As for the images you are tagged in, you will not be able to edit anything.

Proceed as follows:

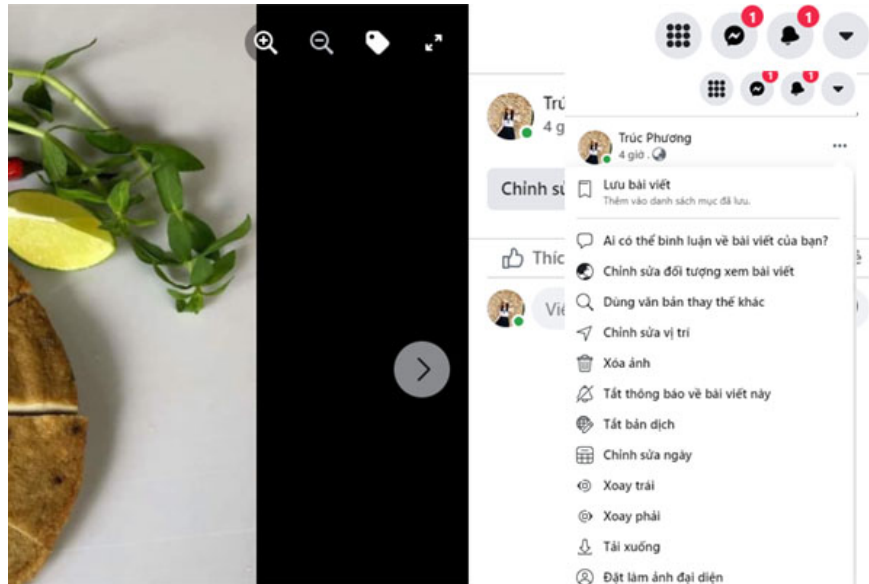

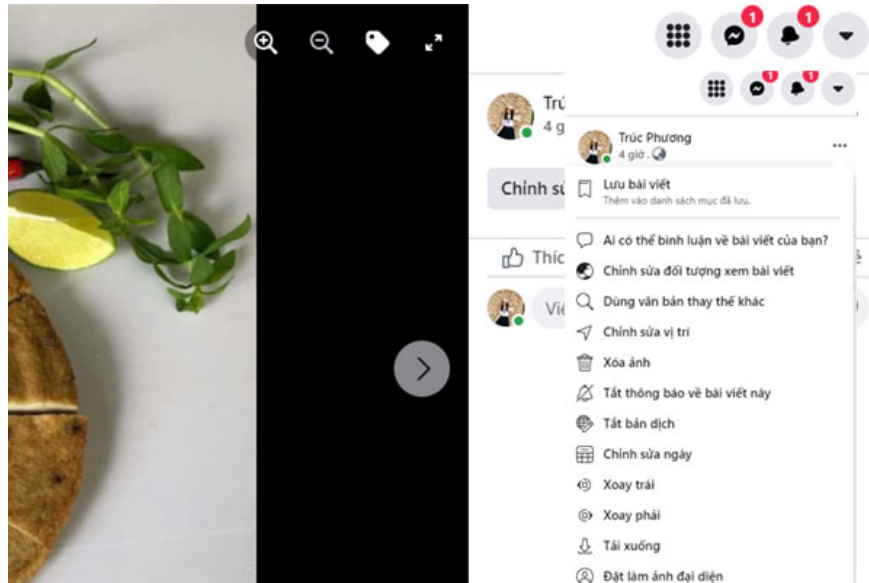

? **Step 1** : Log in and open your **personal Facebook on your computer.**

? **Step 2** : Go to **Photos** > select **Photos uploaded** on your personal page. And find and open the rotated image.

? **Step 3** : Here, select *the 3 dots in the upper right corner of the screen* . Select the **Rotate Left, Rotate Right** option to rotate the image in the direction you want.

Some other fixes:

If by doing the above method you still cannot fix the error of **photos on Facebook being rotated horizontally**, please follow the solutions below. (And this is also an effective way to fix the error of Facebook automatically rotating the screen.)

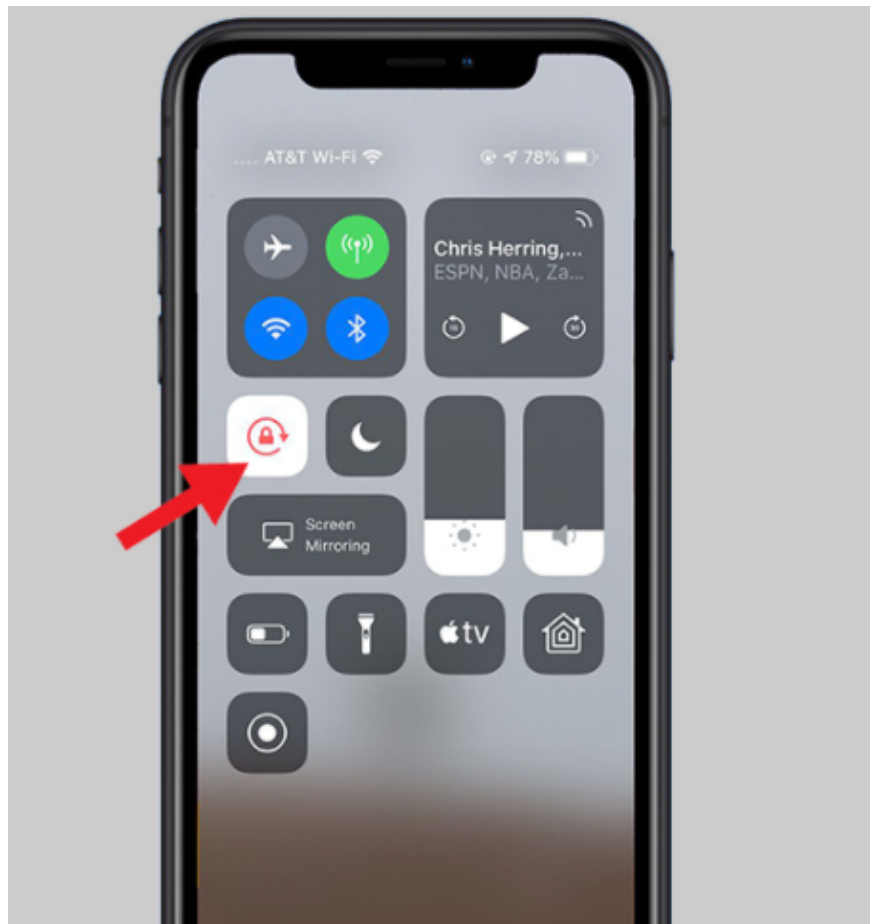

Log out of your Facebook account and log back in

Logging out and logging back into Facebook will be a way to make Facebook update the system and fix errors better. You can also use another Facebook account to log in to your device, then log out and log back in with the old account to fix the error.

In addition, please perform **Power Off and Restart** the device or **Reset phone settings** to fix software errors to resolve errors quickly!

Turn off rotation mode on your phone

If you accidentally set your phone to rotate mode, turn it off. Because when this mode is turned on, Facebook or other applications will rotate when used.

Note:

1. After rotating, you can send the rotated image back to that person. Or you can download it to save on your phone.
2. The photo rotation feature on messenger is currently not supported on computers but only on phones! Therefore, please log in to Messenger on your phone to do it!

So with the above tips, we hope to help you know how to quickly fix the error of **photos on Facebook being rotated horizontally** . Good luck!
