Useful Dota Auto Chess tips you should know

1. Observe opponents when playing

When multiple players use the same unit, the rate of getting that unit in each round will be very low. At this time, the player will be very difficult to upgrade a unit of himself. So you always have to watch what your opponent is playing and from the boat you can upgrade without having to roll multiple times.

In addition, you can anticipate the opponent's lineup to see which team they play to arrange and attack to win more easily. For example, if the opponent uses a lot of normal units, you can use the Human type with the ability

to lock hands or Elves with the ability to dodge is the best choice.

2. Create combo classes and don't pick individual units

BEAST Physical Damage +10% (2), +15% (4), +20% (6) For All Units	ASSASSIN +10% (3), +20% (6) Chance For a Critical Strike

Round 10 - Golems Round 40 - Trolls
Round 15 - Wolves Round 45 - TBC
Round 20 - Porcupine Round 50 - Bushes

It doesn't matter if you don't have many units in the squad, because you know how to combine units together to form a combo from class and species. So your chances of winning are higher than the squad with more units but no combos.

Some suggestions for units of extremely hot Auto Chess species like Puck of the Elf and Dragon Knight species, Dragon of the Dragon and Human type. Lycan belongs to the Human and Beast species. These units can be combined easily with a lot of squad and power has not been reduced. So when you play, try to get these units, as soon as possible.

3. Control your money

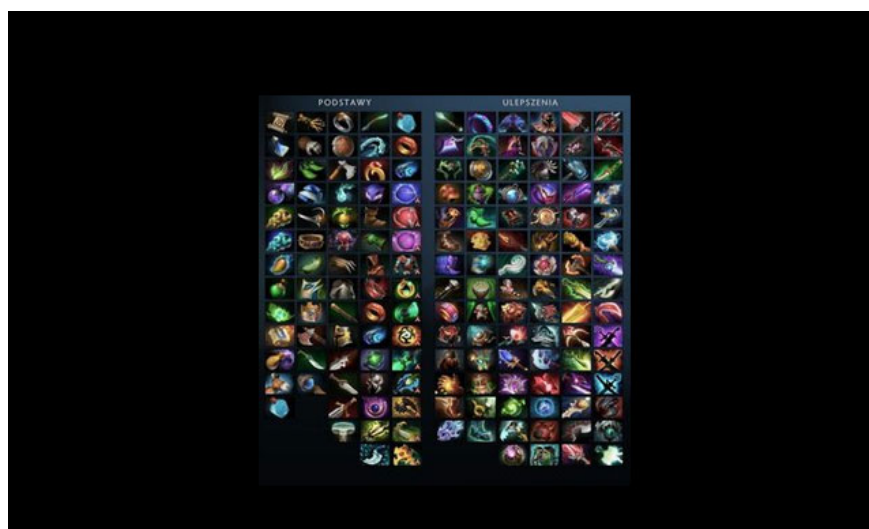

The only source of money for players to upgrade and buy their units on the board. Therefore players need to use this gold as reasonably as possible. You will receive 5 gold for a basic round, 1 gold for defeating all enemy units.

That's not counting the gold based on the winning sequence and an additional amount of gold called gold interest, added based on the amount of gold you have. For example, if you have 10-19 in the previous round, in the next round you will be added to 2 gold, the maximum bonus of gold interest will be 5 gold.

This is the most basic strategy and you should buy what is most needed for you, do not need to change troops and keep doing so until you get 50 gold, so each round you have 5 more gold and just use Use that amount to level up. The higher the level, the greater the chance of having powerful units like epic or legendary, and the higher the number of units on the board.

4. Match the item according to the formula from Dota 2

Equipment is also a very important part to create a winning platform for players, the equipment can fall off when you defeat natural monsters or enemy units. You can also stitch them together with the same formula as in normal Dota 2.

For example, the Hemostatic Mask combined with Quarter Staff has Mask of Madness, some equipment needs formulas, you only need to remove the formula and only need smaller equipment. Small items will be ineffective if used separately, so you can go to the courier and wait until the complete equipment is available, let the Hero be able to get maximum effect.

There are a few simple tips that will help you win in a more difficult way in Dota Auto Chess, be skillful in using resources and combining items. Create combos and watch your opponents around you, just like that, you have more chances to win than other players.
