

Some tips when cleaning the house

Good tips will help you solve housework quickly and simply

Are you one of those people who don't like doing housework? Whether you like it or not, house cleaning is one of the things that needs to be done and don't worry, the following good tips will help you solve housework quickly and simply.

Some tips when cleaning the house

Tips for cleaning the living room

1. To collect all the cat and dog hair on the sofa, run your gloved hands over the sofa's surface.
2. To clean dust from TV and computer screens, use a cloth soaked in fabric softener.
3. Although the carpet is convenient, beautiful, soft, warm, but when it is dirty, it is very difficult to clean. However, I would like to tell you two very simple ways to remove dust for the carpet without the following vacuum cleaner. :
 1. Use an old cloth to absorb water, wring it out, spread it on the carpet, and then hit the damp cloth with a stick, the dust will stick to the fabric.
 2. Spread the fine salt powder evenly on the carpet, use a broom dipped in soapy water, sweep on the carpet, the salt will absorb the dust to make the carpet clean and shiny. If the carpet is dusty, then after using the brush 1-2 times, you should sprinkle more salt powder. It should be noted that when sweeping, always dip the broom in soapy water or clean water to clean the broom.

Tips for cleaning the kitchen

1. To quickly clean burnt food stains on a pan, add a little dish soap and water. Bring to a boil, then let the liquid cool in the pan. Burnt food is easily removed.
2. To remove odors and clean dirt from your microwave, heat a wet dishcloth sprayed with fresh lemon juice for about 40 seconds in the oven. The steam released will soften stubborn stains inside the oven and make your job easier.
3. To clean the sink drain line, pour 1/2 cup of Baking Soda down, continue to add 1/2 cup of white vinegar, and cover the sink. Let the mixture foam for a few minutes, then pour the boiling water down to drain.

Tips for cleaning the bathroom

1. Spray shaving cream on the mirror, let it sit for a minute, then wipe it off. Your mirror should be free of steam for a week.
2. To clean floors, wash glass and prevent mold growth, apply a vinegar and water solution to the surface, then polish with a lint-free cloth.
3. Fill a spray bottle with a solution of bleach and vinegar, spray it into the dirty toilet, and leave it overnight. The next morning, you just need to drain the water.

Tips for washing clothes

1. If your clothes are stained with mud, use a slice of raw potato to scrub the stain. Then soak the clothes in cool water and wash as usual.
2. When drying with a small amount of clothes, put a few dry cotton towels in the drying compartment to quickly absorb moisture and help save money on electricity.
