

Some types of vehicles in PlayerUnknown's Battlegrounds

The vehicles in PlayerUnknown's Battlegrounds game will help gamers move quickly.

One of the ways to run away from enemies or even attack enemies in PlayerUnknown's Battlegrounds is to use the means. These types of vehicles will help us protect ourselves from the pursuit of the enemy. Or you can use those same vehicles to attack the enemy.

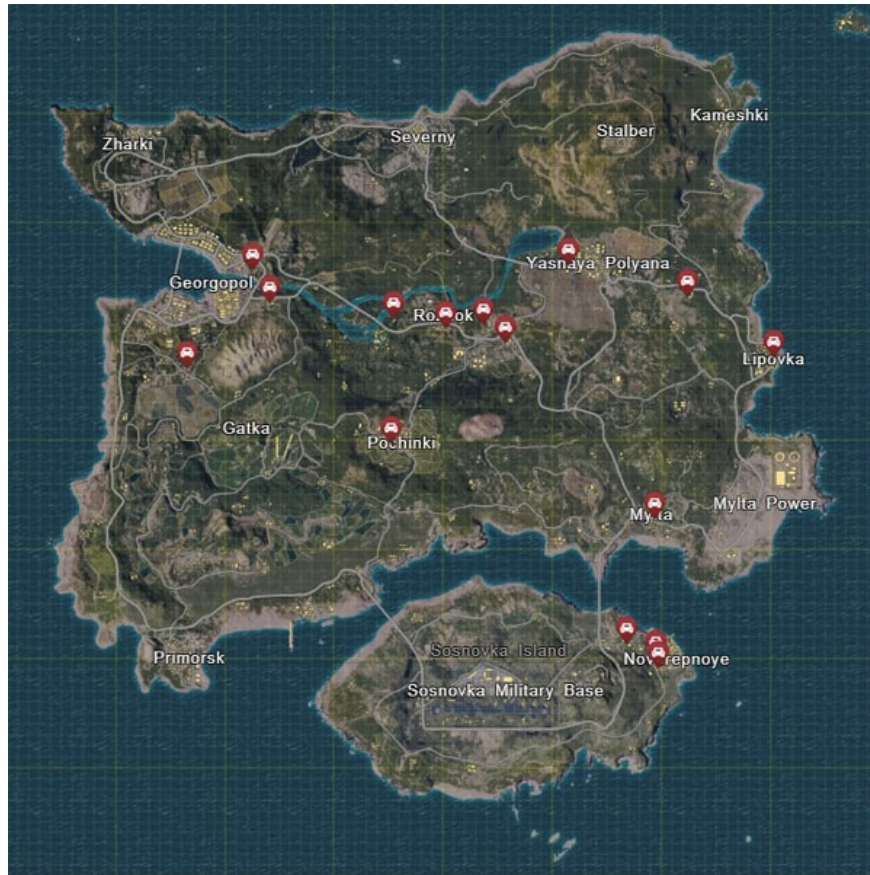

During PlayerUnknown's Battlegrounds survival battle, defending themselves to become the last survivor is the goal of each player. If you have additional means, your chances of survival may be higher than other players. Take a look at some popular vehicles in PlayerUnknown's Battlegrounds.

1. Locations to get vehicles

1. Download PlayerUnknown's PC Battlegrounds game

Where the vehicle spawn in PlayerUnknown's Battlegrounds may change but you can rely on the map below to get the car.

2. Information on some vehicles

Uaz Car (With roof / No Roof)

This is a military truck with 4 seats with a maximum speed of 90km / h. If compared with other vehicles, this car Uaz can be considered slow, so players should carefully use when going through the enemy. The car has a rather bulky appearance, the movement speed is also slow so the player can very well become a firing point for the opponent. Do not use the Uaz car without a roof.

Dacia 100

The car also has 4 seats, the maximum running speed reaches 110 km / h, low fuel consumption. Cars have the disadvantage of climbing hills or places with high terrain rather slowly. The noise level of the vehicle is quite low, so the enemy can hardly hear the sound of the engine without turning on boost.

Buggy

Buggy cars are 4-wheel off-road vehicles, with a speed of 100km / h, which has a special acceleration when climbing the terrain. However, the car has a weak point that is not shielded so it is easy to be shot, when someone sits behind. It's best to drive alone to limit the shot. Vehicles have low fuel consumption levels.

Motorbike

Motorcycles in the game have fast moving speeds, speeds up to 130km / h and can carry 2 people. If you want to launch quickly, this is the first choice. When riding a motorbike fast, you can avoid being attacked. Vehicles can climb hills with high acceleration and no boot mode.

3-wheel motorbike

Motorcycles can carry 3 people, but will be easily deviated because of 3-wheel design. While controlling, pay attention when plunging down the hill. Because if you run at a speed of 100km / h and your car turns over, you may lose your life.

PG-117

This is Cano with a traveling speed of 90km / h that can carry 5 people. Cano will use it in a zone run, move to a remote location or pick up items. If boost needs 1 fuel tank for 2km distance.
