

Sony introduces FE 85mm F1.4 GM II lens with super fast focus

The Sony FE 85mm F1.4 GM II lens has up to 7x improved subject tracking performance compared to previous generations.

Sony has just launched the FE 85mm F1.4 GM II lens (SEL85F14GM2) which integrates two XA (super aspherical) lenses and two ED (extra-low dispersion) lenses. This combination provides uniform high resolution across the entire frame. Furthermore, Sony's exclusive Nano AR Coating II technology helps suppress flare and ghosting.

The FE 85mm F1.4 GM II's autofocus system is quite agile, maximizing the speed advantage of advanced camera bodies. For photography, the new lens achieves a speed 3 times faster than the previous generation, focusing on moving subjects with high precision. In addition, the FE 85mm F1.4 GM II also has a subject tracking performance improved by up to 7 times.

The FE 85mm GM II incorporates a linear motor, which reduces focus breathing and supports focus breathing compensation when mounted on a camera body. The lens has two customizable focus hold buttons and an AF/MF switch for flexible operation.

Sony FE 85mm F1.4 GM II lens has a reference price of 49.99 million VND.
