

Sony launched the Truly Wireless WF-XB700 series of breakthrough phones

This is the first Truly Wireless headset from the Extra Bass™ Series, which incorporates technology from Sony, an expert in audio equipment, to make a difference with the detailed sound standard.

Sony has officially introduced the Truly Wireless WF-XB700 headset with Extra Bass™ technology for thick, detailed sound, suitable for many music genres; New generation Tri-hold earbud design holds the ear firmly and comfortably to the user.

Battery life on each headset is up to 9 hours in a row, a total of 18 hours with the charger and fast charging capability: 10 minutes of charging for 60 minutes of use.

WF-XB700 has two color versions suitable for young people: blue and black, comes with 4 pairs of eartips with different sizes. With the new generation Tri-hold earbud design with 3 different points of contact, the WF-XB700 creates a firm grip on the ears, suitable for movement but does not cause aches and pains.

The physical buttons on the WF-XB700 not only allow users to play, pause or skip tracks, but also adjust the volume, easily access the voice assistant on a smartphone and make hands-free calls. .

Fine-tuned and optimized by leading audio engineers, Sony products, including the WF-XB700, always focus on exploiting the most distinctive experience values ??and element use. reality as an inspiration.

To achieve absolute perfection, Sony engineers are constantly pursuing the ability to reproduce detailed sounds in thousands of different ways and create the most realistic, realistic sound standards. All the subtle changes of the sound, from the beginning of the performance, the reverberation around the room, and the gradual fading of sound at the end of the performance, are all recorded and reproduced faithfully.
