

Sony launches two new models of bluetooth headsets: Active noise cancellation support

Besides true-wireless headphones WF-XB700, Sony also introduced a new mid-range model with ANC called WH-CH710N.

Sony is one of the leading wireless audio equipment manufacturers in the world, possessing a huge number of products with many types of Bluetooth speakers and headphones at different prices. Recently, the company has introduced two new models of headphones, called WF-XB700 and WH-CH710N.

Sony WF-XB700

Starting with the **WF-XB700**, this is a model of true wireless headphones (True Wireless) equipped with Sony's Extra Bass technology. This technology promises to deliver accurate, powerful bass rhythms but still retain clear vocals, perfect for those who love the EDM or Hip-hop genre.

It features an ergonomic three-point "Ergonomic Tri-hold" design, which makes the earphones exposed to the earcups at 3 points of high certainty and provide a comfortable feel for long-term wear.

Sony WF-XB700 charging case

Besides, it is also IPX4-rated waterproof, supports fast charging that allows up to 60 minutes of music listening with only 10 minutes of charging, while the total battery life when used with a charging case is 18 hours.

For the **WH-CH710N**, this is a mid-range model with active noise canceling (ANC) technology from Sony. It features a premium design with adjustable metal slider, supports NFC connectivity and has a soft oval earpad, helping to bring the most comfortable feeling for users.

Sony WH-CH710N

Sony's new hooded headphones are capable of noise cancellation by AI, using the built-in dual microphones to continuously analyze the ambient audio components, thereby automatically setting the sound-canceling mode. Noise most effective for users. In addition, it also supports fast charging, 60 minutes of use with 10 minutes of charging and has a total battery life of 35 hours.

Price and release time

As expected, both new Sony headphones will be available in April this year. True Wireless WF-XB700 headphones are sold for \$ 129.99 (about 3.1 million), there are two color options are Black and Blue. The WH-CH710N hooded headset, on the other hand, retails for \$ 199.99 and only comes in Black.
