

Sony launches Xperia 1 Professional Edition, supports LAN connectivity, priced at 30 million

Sony, the Japanese brand has recently launched its new flagship phone called Xperia 1 Professional Edition with some special upgrades.

Sony, the Japanese brand has recently launched its new flagship phone called Xperia 1 Professional Edition with some special upgrades. Among them is the support for LAN and Ethernet connection via USB-C.

It is equipped with a 4K OLED screen, 21: 9 aspect ratio, supports 10-bit signal. The screen of the device is better adjusted thanks to the calibration of the Illuminant D65 profile - available on the TV Master series.

Xperia 1 Professional Edition has an Imaging Edge Mobile app that allows users to transfer photos and videos wirelessly from its camera to a phone.

Sony's new phone supports photographers to add tags and voice annotations through the Transfer & Tagging utility.

The hardware of Professional Edition is not much different from the previous version of Xperia 1, which is still the Snapdragon 855 processor, 6GB RAM, 128GB of internal memory and a 3300mAh battery.

Sony will launch the Xperia 1 Professional Edition on October 25 in the Japanese market for JPY 143,000 (approximately VND 30.5 million).

1. Google launched the duo Pixel 4 / Pixel 4 XL, 90Hz screen, Snapdragon 855, priced from 18.6 million
2. Xiaomi designed a new smartphone: 2 selfie cameras at the edge of the bezel
