Sony today officially added a new screen size to the Vaio S line for its businessmen. In addition to the previous SA model with 13.3-inch screen, this model will have an additional Vaio SE with a larger screen size of 15.5 inches.

Sony Vaio SE with 15.5-inch screen size (on the left).

Thanks to its larger size, Vaio SE will have 10 dedicated keys, a thin 2.5 cm and AMD Radeon's dual-graphics card system with VRAM memory of up to 1 GB. The Sony Vaio SE has a slim battery accessory to double the amount of battery life for the device.

Sony's new announcement also comes with a software update for the two high-end Vaio F and Vaio L desktops all-in-one.

Vaio F and Vaio L update software.

In addition, the Vaio SB series also has the option of new colors red, black, white, blue and earlier. All Vaio SA, SB and SE models use Intel Core i second generation processors.

The new update is also applied for Sony Vaio E series more options Intel Core i5 second generation and Vaio C with more options Intel Core i7 quad core. The Vaio Y series will be available in addition to pink and silver.

All new updates will start from October 6.
