The Vaio P39VL and P31ZK are equipped with Intel Atom Z550 and Z540 CPUs like the Vaio X, the lightest laptop in the world officially launched last week at Ceatec 2009. While the Vaio P31 is available in white and black, using hard drives 80GB HDD and running Windows 7, Vaio P39 is equipped with more advanced 128 GB SSD drive and Windows 7 Professional operating system but only in black.

According to Notebookitalia, both Vaio P39VL and P31ZK still have the configuration frame including 8-inch screen, ultra-high resolution of 1,600 x 768 pixels, 2 GB RAM, integrated Intel GMA500 graphics card and 3G connection trendy Vaio Everywair.

Currently, Sony has not disclosed any information about the price and official selling time of the two upgraded Vaio P versions.
