

Sony Vaio P rival from Fujitsu

Fujitsu LifeBook UH900 5.6 inch screen, supports multi-touch with a weight of 500 grams is the world's smallest and lightest portable computer.

Fujitsu LifeBook UH900 5.6 inch screen, supports multi-touch with a weight of 500 grams is the world's smallest and lightest portable computer.

The appearance is quite similar to *the* Sony Vaio P model with a seven-ball, three-color design. Both are equipped with Intel Atom Z530 processors and SSD solid-state drives. But the screen of LifeBook UH900 is smaller, large 5.6 inches, high resolution of 1,280 x 800 pixels and is a multi-touch screen, supporting execution with fingertips and touch pens.

Fujitsu LifeBook UH900 new rival of Sony Vaio P.

Cnet said, LifeBook UH900 features the handheld computer, ultra-compact size 204 x 106., x 23.8 mm, fully integrated wireless connectivity from Bluetooth to 3G. And according to ePrice, the price of Fujitsu LifeBook UH900 is quite " *chat* ", about 1,700 USD, not inferior to Sony Vaio P.
