Among the three Vaio branded laptops introduced, the Z series, with the VGN-Z26GN representative, is the most advanced model. This machine is designed and manufactured in Japan. Its advantages lie in its high mobility, durable structure and the integration of modern technology.

The body is made of carbon fiber, both durable and light weight down to approximately 1.48 kg. 13.1-inch LCD

screen, resolution up to 1,600 x 900 pixels is equipped with a hard coating with anti-scratch effect. In addition, the structure of this machine is also very solid because Sony uses solid aluminum materials to produce.

Sony Vaio VGN-Z26GN is equipped with a high-intensity 12-layer motherboard, Intel's Centrino 2 processing technology, two Nvidia GeForce 9300M GS graphics cards and Mobile Intel Graphics Media Accelerator, 4 GB RAM and a 320 GB hard drive.

The security of this machine is guaranteed by fingerprint sensor and TPM security chip. The Vaio VGN-Z26GN is equipped with 802.11a / b / g / Draff n wireless connectivity, two USB 2.0 ports, an HDMI port, memory card reader and a connector to the external monitor.

The device is preinstalled with Windows Vista Business operating system. Estimated price at Sony Center is VND 39,990,000.

Vaio VGN-SR26GN satisfies the needs of office and entertainment work.*Photo: Sony Vietnam .*

Sony Vaio VGN-SR26GN is a model that harmonizes work and entertainment needs with weighing only 1.8 kg and slim body. The black casing is made of magnesium alloy and offers durability and toughness, while also increasing its impressive appearance. The full-pitch keyboard is specially designed, with buttons that combine with each other in color, while making a difference, making operation easier and more convenient.

The stylish laptop is powered by an Intel Core 2 Duo processor, Mobile Intel Express chipset, ATI Mobility Radeon graphics card and Intel Graphics Media Accelerator x3100, providing very high performance for both business applications and entertainment. In particular, the Vaio VGN-SR26GN also possesses an advanced software / response solution called Switch, which helps to flexibly switch the machine's operating mode to suit specific environments or types of work.

Data stored in the hard drive will be secured in case of crash or impact during use, thanks to HDD Protection technology. In addition, the device also has a built-in fingerprint recognition sensor to increase security, cameras change in the direction of view and microphone to support remote conferences.

Sony Vaio VGN-SR26GN will be sold in Vietnam market for VND 29,990,000.
