The information was confirmed by a representative of Sony in the event that the company launched two recent Vaio models, NW and netbook W. The new model was upgraded to speed, Vaio P was previously slowed down, recently it has had changes change when launching faster model or Windows XP version.

The ultraportable Vaio P Mark 2 may appear in October or November of this year, and there is no information about the configuration of the device yet. Earlier this week, the Japanese manufacturer officially entered the netbook segment when introducing the Vaio W for \$ 500.

Vaio P is a line of ultra-portable computers with stylish design, small 8-inch screen, wide horizontal. The device has a slow speed, but the price is up to more than 900 USD.
