## Experience SONY XB950BT Bluetooth headset

After experiencing the Sony MDR XB950BT bluetooth headset for a while, I was very happy, warning you that after listening to this Sony headset, switching to the lower price headphones will be a bit boring and weak. Unlike some earphones of Beats, Bose . Sony headsets always let clear headset specs, clearly explain each technology publicly, this is the point to get the hearts of most users and of course in It can't be without me.

Without discussing much about the looks of Sony MDR XB950BT, I would like to evaluate more details about its features and sound quality so that readers will have more useful information before making a decision whether to buy it and return it. enjoy music every day or not.

Sony XB950BT has a luxurious style and exquisite feel.

Sony XB950BT is best heard when using plug-and-play ear, strong and firm bass, especially with high quality lossless (.flac) music files. Frequency range when using the headphone cord of the headset is 3 - 28kHz, which means you will enjoy the smallest and highest sounds, the sounds that other headsets can hardly perceive . Because I tried many different headphones, I felt quite satisfied with Sony XB950BT on this point.

Surprisingly in this headset is when turning the volume up to the loudest level, the bass is still strong and it doesn't get tired or soundy, otherwise your ears feel like being massaged, immersed Exciting but realistic musical melodies. Sony XB950BT bass band also does not encroach on two mid and treble bands much, keeping the detail and smoothness necessary for the music. Therefore, above I confirmed Sony XB950BT is not a bad choice for bass lovers.

The Sony XB950BT headset has 2 vents, which make the bass clearly not squeezed.

When using bluetooth, Sony XB950BT wireless headset sound quality will be reduced a bit, it is because bluetooth 3.0 technical wave nature can not support full signal transmission, at this frequency via bluetooth of the ear Sony XB950BT listening will be 20 - 20kHz. In return, the headset has the ability to enable baseband with Bass Boost button for powerful bass to make the sound emit extreme and extreme. If you are using bluetooth, if you plug in a 3.5mm cable to Sony XB950BT, the bluetooth will automatically turn off immediately.

Sony XB950BT is equipped with bluetooth wireless connectivity, NFC, so you can easily connect to smart devices.

A word of advice for you guys who intend to use Sony XB950BT to listen to music while exercising, think again, because while wearing headphones and practicing, it will be very hot and frustrating. In addition, because the size is relatively large, when wearing the earpiece, this ear pillow is not easy to lie, we can only lie on our back.

## Some impressive parameters of the Sony XB950BT headset

Here are a few impressive parameters that I do not regret my hand but spend a lot of money to buy Sony XB950BT, even though the price is "acid" up to VND 3,800,000:

1. The ability to reproduce sound in the frequency range from **3 - 28kHz** (using the 3.5mm jack cord).
2. Connect with **NFC** and bluetooth quickly.
3. Enjoy music for up to **20 hours** , charge for 4 hours with your 1A charger.
4. Allow connecting bluetooth with **10m distance** .
5. **Powerful** high-end **Neodimium magnets** help reproduce sound more accurately, used in most high-end headphones today.
6. Removable ear cushions for washing.

Sony XB950BT delivers powerful resonance melodies, making you always want to listen to music day and night.

Overall, Sony XB950BT is a perfect choice for those who prefer Dance music, with strong bass, or use bluetooth and do not mind carrying a large headset. Although the price is relatively high, the Sony XB950BT is absolutely worth it.
