

Sophia, what was the first robot with citizenship rights about Industry 4.0 when coming to Vietnam?

Today (July 13), the first robot granted citizenship in the world Sophia came to Vietnam and spoke at the High-Level Forum and International Exhibition of Industry 4.0.

Today (July 13), the first robot granted citizenship in the world Sophia came to Vietnam and spoke at the High-Level Forum and International Exhibition of Industry 4.0.

Sophia is a humanoid robot with artificial intelligence that has been granted citizenship by Saudi Arabia.

At the event, after introducing herself, Sophia shared about the purpose of attending the High-level Forum and International Exhibition of Industry 4.0 in Vietnam, she wanted the world to know the sustainable development and objectives. This will be achieved when humans cooperate with robots.

Later, Sophia answered the questions posed by the audience in the auditorium.

Sophia said that in order to make great leaps in Vietnam's economy, it is necessary to take advantage of opportunities such as IoT, BigData . and need to have technological innovations. In addition, the Government of Vietnam needs to develop policies to ensure technology development in all areas, benefiting all Vietnamese. And human intelligence will help Vietnam achieve those goals.

'Vietnam needs to be at the forefront of innovative applications and technologies that give employees more job opportunities. For example, thanks to smartphones, traditional drivers have more jobs when making Uber, Grab.'

Sophia also affirmed that technology can help people carry out tasks that have never been achieved before, bringing a better life, such as high-tech surgery .

Revolution 4.0 is an opportunity but also a challenge for the young generation. In this regard, Sophia said that, in order to get a job in the 4.0 era, the younger generation faces many challenges and to overcome them, they need to be better equipped with 21st century skills.

Sophia said: *'I heard that there are many startups in Vietnam. And this is a very good trend for you to anticipate future technologies. We won't be able to reach our goal if young people fall behind.'*

In addition, Sophia said that if you do not want to be left behind people need to constantly innovate in new technology. And the Government of Vietnam needs to have clear priorities in training, education, . to solve the development bottlenecks of our country.
