

# Spectacular escape screen of giant octopus through small holes

After being captured and put on a boat, the large-sized octopus explored around and tried to find a way to escape to the sea through a small hole.

After being captured and put on a boat, the large-sized octopus was looking around and trying to find a way to escape to the sea through a hole.

1. Spider crabs compete to tear the octopus's corpse under the sea
2. The blue-spotted octopus has 50 times more venom than a cobra that kills people in an instant

Let's review the process of the giant octopus escaping from the boat through a small hole knowing its defection is successful.

Octopus is a clever marine creature and contains many interesting mysteries. They have full body soft and no bones inside. This feature has helped it escape successfully.
