

Speedboat runs 'race' with the jet in the sky

In the recent run of the new railroad, the super speed train TGV (Train Grande Vitesse) of France at 320 km / h, can run on the same level as a jet flying at the altitude close to the ground causing many not surprised.

In the recent run of the new railroad, the super speed train TGV (Train Grande Vitesse) of France at 320 km / h, can run on the same level as a jet flying at the altitude close to the ground causing many not surprised.

1. Super speed boat 5 times the speed of sound can travel along the UK in 8 minutes

The maximum speed of jets is very high, even up to 1800km / h. With this speed, of course, super speed train doesn't even "smoke smoke", but rather refers to racing with jet aircraft.

But with the altitude close to the ground, delta-winged jets need to keep a certain speed, so the super speed train can keep abreast of the aircraft.

Super speed boat "racing" jet.

Even if the aircraft "deliberately" slowed down, the feeling of being "racing" with an airplane with passengers on the high speed train was also excellent.
