

Speedtest announces VNPT as Vietnam's No. 1 Internet network operator

During the test, VNPT achieved download speed of 64Mbps and upload speed of 65.07Mbps.

Speedtest test results of Ookla Organization show that VNPT is the fastest Internet operator in Vietnam. These results are estimated by Speedtest from nearly 5 million tests of the speed of Internet access of customers using broadband and fixed services in Vietnam in the first two quarters of 2019. Speedtest conducted the evaluation process and This aggregation is completely independent, objective, reliable, service providers were not informed in advance.

During the test, VNPT achieved download speed of 64Mbps, upload speed of 65.07Mbps, recognized as the number 1 Internet access network operator in Vietnam. With this speed, users can watch online movies, livestreams on social networks, play games smoothly, without lag.

Speedtest's data analysis process consists of four steps, complying with the world standard process including:

1. Collect data from users using Speedtest to measure network speed.
2. Filtering data by eliminating impacts such as geographic distance, speeding itself, etc. may affect the results.
3. Standardize data by location, time frame and user.
4. Summary of results to give exactly which provider has the fastest speed by location, time.

Currently, many operators in the world use Speedtest measurement results such as PLDT (Philippines), CHT (Taiwan) .

In February 2019, Speedtest also announced VinaPhone is the network operator that is most appreciated by Vietnamese users for 3G / 4G speeds, based on evaluation data from users in the third and fourth quarters of 2018.

1. Viettel is the first and only operator in Vietnam to support eSIM according to Apple standards
2. What is virtual mobile network (MVNO)?
