

# Split wallpaper from Windows 7 Theme

In the tutorial below, we will cover some basic actions to separate wallpaper wallpapers from any theme of Windows 7 ...

**TipsMake.com - In the tutorial below, we will present some basic actions to separate wallpaper wallpapers from any theme of Windows 7.** After copying or downloading from the Internet to your computer, the first thing to do First, check if the Windows Theme Pack file is correct by checking the **Properties - Properties** :

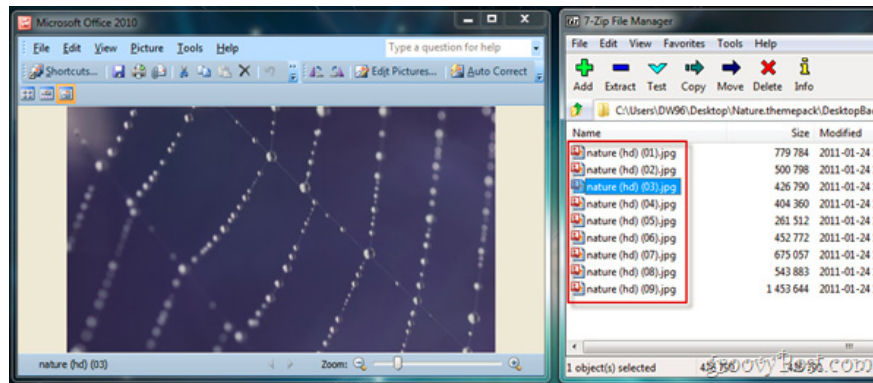

Next, use an extracting program like WinRAR or 7 zip and open that theme package:

Then, locate the DesktopBackground folder inside:

Here, you can see and choose exactly which background images you want if you want:

Very simple and easy. Good luck!
