

## Standard tips in PUBG Mobile

If you know how to pinpoint the gun, you will be able to easily shoot and defeat the enemy more in PUBG Mobile

Everyone knows in PUBG Mobile, in addition to the lucky factor, to have good skills to win the TOP 1 in the game. One of the winning decision skills is the grip of the gun, each gun has a different way of minding because of the different recoil.

If you don't have control over your control skills, then you have to incorporate many other factors. If you haven't controlled your weapons well, check out some of the tips below this article.

### **PUBG Mobile: Tips to help you be more effective in the game**

1. Download PUBG Mobile for iOS
2. Download PUBG Mobile for Android
3. Download PUBG Mobile for Windows

#### **1. Practice regular attachment**

If you play PUBG Mobile on your phone, you will not be able to drag the mouse to pinch it, so the way to secure your phone will be based on shooting mode and distance. And the most effective distance to mind is 50m (depending on terrain, it will be lower), and tap from 3-4 members in this distance, below 10m, you can fan continuously.

When you play PUBG Mobile with your mouse and keyboard, if you want to take the best care, you have to practice by dragging the mouse when shooting, you can go into Training Mode to practice your mindfulness. If you have entered the game, the required factor must be calm, many gamers meet the enemy in the game then stalked and panicked, only to watch and click the mouse repeatedly to release the bullet without caring about whether the bullet hit the enemy or is not.

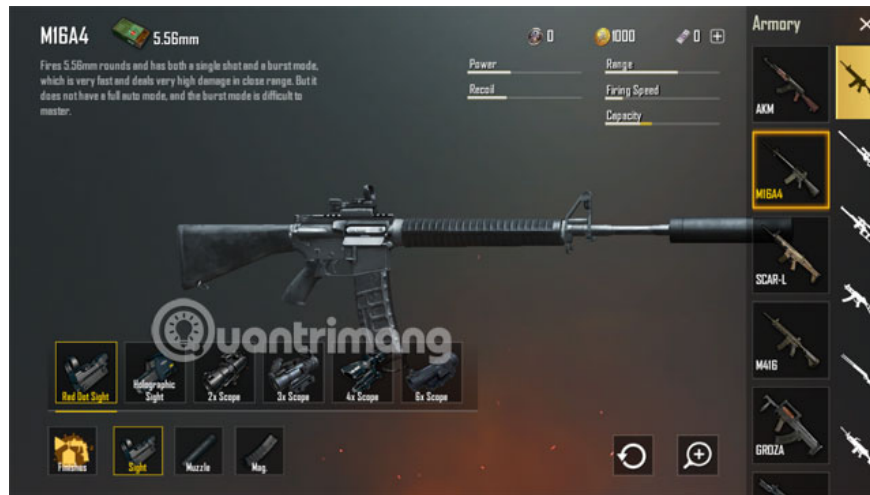

## **2. Must have a Red Dot or X2 equipped weapon**

Yes, because if you are equipped with DMR or Sniper, you must be X4 or more, but X4 can only tap one shot at a time, but not Burst or Auto because if shot like that, there is a high chance of only 2 shots. on the enemy, and the third member will have a 50% chance of winning.

So you should equip the Red Dot or X2 for the remaining gun, this one must be an AR or SMG to be effective. And when combined with Red Dot or X2, you will be mindful of an extremely effective and easy way.

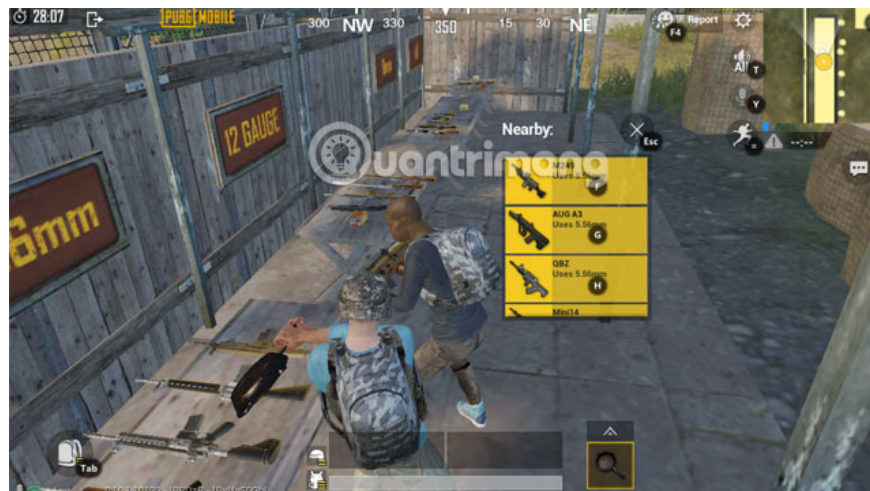

## **3. Attach all accessories to the gun**

In addition to the above two accessories of Red Dot and X2, I need to get all the accessories for the gun I am using. Especially for those who have not yet learned how to grip the gun, look for the following accessories to attach to your weapons: Compensator, Shock absorber, Cheekpad and Stock.

In addition, players also have to equip their weapons with expanded ammunition tape, expansion tape instead of rapid expansion. This accessory will help your weapon expand the number of your bullets.

#### 4. Select the weapon that matches the shooting style

Surely everyone knows this if you want to be mindful of the most effective way, but not every player can keep the weapon that suits you best. Most gamers find it better to pick up gold, even if they know that it is not suitable to shoot it.

Not to mention the player will have to find the right accessories and ammunition for that weapon, if the previous gun you are using also shares the same accessories, you will not have to look anymore. The advice for you is to keep the weapon in accordance with the shooting method and choose which weapon is not much sought by players to practice, such as Vector or M16A4 for example.

#### 5. Select Auto shooting mode

Auto shooting mode is the most flexible shooting mode for all gamers, because in this mode the player can shoot 1, or shoot 3 shots at a time. Except for guns that only have Burst mode and Single mode, such as M16A4, gamers will be limited in distance if using guns like this.

For guns with single shot mode such as DMR line (except M14 EBR and VSS) and Sniper, the range of use is usually from mid-range to pour because if used at close range, gamers will have to switch to longer guns again to attack because DMR and Sniper are not flexible if they meet AR or SMG at close range.

Those are the tips that will help you use weapons and get better at PUBG Mobile, in addition to having to practice regularly to have good shooting skills, you need to be calm to handle the situation in a way. effective when encountering an enemy, avoid stalking and then release bullets again.
